WE, the staff of the 1916 DEBRIS, take great pleasure in presenting this, the twenty-eighth volume, to our friends and fellow students in Purdue.

In response to a feeling of indebtedness to the members of the '16 class, we have labored conscientiously to make this volume the best. As to how far we have fallen short in our aims our readers must judge.

If in years to come, as you perhaps look back through these pages, memories of old friends and places will be refreshed and you are made happy thereby, then we are satisfied.

History of Purdue

WHAT can be more fitting in this busy day when we observe around us a university at the front among schools of its kind throughout the country, provided with beautiful buildings, good equipment, and an able instructive corps, than to stop and ponder for a moment over the historical events and early struggles, the successful outcome of which makes it possible for us today to be so proud of our Alma Mater?

Purdue University is one of the many so-called "Land Grant Colleges," which have been based upon the Morrill Act of 1862. This act provided land grants for the foundation of colleges of Agriculture and Mechanical Arts. Indiana was one of the first states to accept the provisions of this act and in 1862 the location of the university was one of the first questions that confronted the state. A great rivalry over the location sprang up in various sections of the state and it was not until 1869 that the question was finally decided in favor of the present site on account of appropriations subscribed for the new institution by John Purdue and citizens of Tippecanoe County.

It was not until 1874 that instruction began, and that only in a provisional way, in order to meet the conditions imposed by the Federal government under the appropriation. Purdue, like most institutions of learning at that time, had a strenuous struggle for existence in her early days. At this time it was in fact little more than a preparatory school. It was not until the coming of President Smart in 1883, that real and substantial progress was made. For seventeen

years this man labored incessantly for the betterment of the University. Purdue owes much to President Smart.

It was during this time that most of the Mechanical Arts courses were established and many of the present buildings were constructed. On the death of President Smart in 1900, W. E. Stone, who had been carrying on almost alone the work of the University during the illness of President Smart, was named as his successor and is still serving in that capacity.

The last fifteen years have easily been the greatest in the history of the University as it has undergone a growth which is little short of phenomenal. Its first graduating class had only one member while last year over 350 bachelor degrees were conferred upon graduates. Since Purdue first opened her doors approximately 20,000 students have been enrolled not counting the preparatory classes in the early days. Accompanying this growth new departments have been added and admission requirements have been raised. Today the University is supported by legislative appropriations from the Federal government of \$69,000 annually and from the proceeds of an endowment of \$340,000 granted by the Federal government and held in trust by the State.

As the end of our student career draws near and we look back over the early struggles of the University for its very existence, we have good reason to revere the memories of those who did their work so well during this time. The future lies before us and we see nothing but glory and success for our Alma Mater in the years yet to come.

McGill—"I nixed them that time."

Purdue Day at the Exposition

Purdue World's Reunion at Panama-Pacific International Exposition

THE World's Reunion of "Purdue-ites," August 20-21, at the Panama-Pacific Exposition, under the auspices of the Purdue Alumni Association of San Francisco and the Exposition Officials, will remain forever a memorable occasion in the minds of those fortunate enough to witness the event. Registration was carried on on the 20th and each guest was presented with a handsome

badge. The headquarters, the Indiana Building, was appropriately decorated in flags; while quite a little Black and Gold bunting not only added to the attractiveness of the building but made it more inviting to the Purdue alumni.

In the evening, the crowd gathered at the booth of the American Telephone and Telegraph Company, in the Liberal Arts Palace, and talked direct to alumni gathered at Omaha.

Chicago, and New York. If not the first yell, at least the first Purdue yell ever flashed over a wire from coast to coast, was given by the aggregation of alumni at the Exposition end of the line. President Stone was one of the prominent speakers over the transcontinental line.

On the afternoon of the 21st, the Exposition Officials presented the beautiful bronze plaque (a cut of which is shown below) to the visiting alumni in recognition of their help in making the Exposition a success.

Following these ceremonies, a reception was held in the Indiana Building where refreshments were served by charming Indiana girl visitors to the Exposition. The remainder of the evening was spent in an informal dance. This marked the close of the most auspicious reunion of Purdue alumni ever held. If more reunions of this type were held, the spirit of Old Gold and Black would be spread from coast to coast.

Senior Class History

OVER six hundred and fifty strong, we gathered at Fowler Hall four years ago to hear our first address of welcome at Purdue. We were unfamiliar with the university ways and customs and the size of the crowd at that meeting astonished us. However, we have since learned and appreciate the greatness of the school.

Our first real obstacle to overcome was the Tank Scrap and, being overzealously advised by upperclassmen, we lost. But we knew our places and took our medicine like men.

It was while we were Freshmen that the disastrous flood of the Spring of 1913 came. Brown street bridge lost a span and Main street bridge was wrecked. In a heroic attempt to rescue several people from the isolated Brown street levee, a member of our class lost his life. For a short time, communication with the east side was cut off. The water works, lighting and heating systems were out of commission. For nearly a week, work at the university was carried on under difficulties.

Our Freshman year saw the advent of the Purdue Circus, given by the Senior class, and the May Day festivities given by the Purdue girls in the afternoon. This carnival has grown more and more since its origination.

The first year had brought many changes and the Tank Scrap of our Sophomore year was conducted under the guidance of the blue law committee. Again we lost as we were outnumbered nearly two to one. Although the cleanest scrap ever staged here, it resulted in a fatality to one of our classmates. At a general student meeting the following day, the historic Tank Scrap was abolished and another Purdue custom became a memory.

Our athletes, who had shown promise as Freshmen, gained places with the various varsity teams and throughout the remainder of their college career, have formed a valuable part of the varsity.

Dark blue hats with orange bands marked us as Juniors everywhere. The military spirit, which had been very noticeable with the cadet corps, was fanned into a blaze with the appearance of Battery B, made up of university students. The broad Main street levee was completed and the modern concrete bridge opened to traffic. Commerce with the east side which had been interrupted from time to time, was now carried on with certainty.

When at last we wore the corduroys, we felt as though the end was near. During the three years we had been here, the class had worked for financial reforms and at last it has gained the well earned reputation of being the one class that had secured the passage of many much needed financial amendments. The quickness of other classes to follow our example has spoken well for us and them.

Several misfortunes have occurred during this year as the old red university armory was destroyed by fire only a few days after one of the fraternity houses was burned. A new armory, which will be built soon, is expected to be the best in the Middle West.

The old Purdue bell has been housed through the efforts of our Senior class and the Student Union cause has been ably championed.

As we leave the university, we regret that our stay has been so short but we depart with a firm determination always to honor our Alma Mater and to make her name stand out as symbolic of true men and women.

School of Agriculture

ALTHOUGH a course in Agriculture was announced as early as 1874, the first real step toward establishing it was taken by the trustees in 1878 when Charles L. Ingersoll was appointed as the first professor of Agriculture. It was not until 1879 that the work really began in earnest.

In this year the school opened with one professor and seven students and the class is credited with doing highly satisfactory work. In 1884, James Troop was appointed as professor of Horticulture and Entomology. In order to popularize the school the Winter course in Veterinary Science was offered in 1888, a course which later developed into the Winter School of Agriculture and which now attracts about two hundred students each year.

Those who are responsible for the laying of the foundation of the School of Agriculture had to contend with many discouragements. There was little interest in agriculture as a science, equipment was meager, and funds were very limited. The enrollment of regular students was therefore very small, the number up until 1901 never exceeding fifty in any one year while at present nearly double that number graduate each year.

The establishment of the Experiment Station and the organization of the Farmers' Institute in 1887, the Winter course in 1888, and the erection of the Agricultural Building in 1901 were all important factors in interesting the farmers in agricultural work and the institution. The Short Course was founded in 1903; students began to come in numbers and the cause of agricultural education after twenty-five years of struggle and discouragement had won.

The foundation had been well laid and from a small and humble beginning in 1879, it has grown to be the largest school in the University, consisting of a six-hundred-acre farm, several large and well equipped buildings, seven departments, a faculty of fifty teachers, an enrollment of eight hundred students, and a Farmers' Short Course enrolling two thousand farmers annually. The course as now offered consists of a uniform plan of study for all students for the first two years, after which a wide range of choice is offered in electives designed to fit students for various important lines of agricultural work, such as Agronomy, Agricultural Chemistry, Animal Husbandry, Dairying, Entomology, Horticulture, and Poultry.

not allowed athletics to interfere with
his school work, however, for he has

As to being kind hearted, it is hard

so far as to say that this trait is only
exceeded by the length of his pedal

Football, Varsity (2). Class (2). Wrestling (2) (3) (4); Won "P" (2) (3) (4). Insignia Board (2). Executive Board (3).

"Willie" undoubtedly should be a basketball man coming from the state renowned town of Wingate. He is a tall, stately individual, possessing an enormously large heart and as a rule does not have much to say, but when he does speak it is to utter something worth listening to. As an athlete, he is the best heavyweight wrestler Purdue ever turned out, and was one of the mainstays in the football line-up.

BRICKLEY, HARMON F.

"Brick" came to us from Bluffton, a typical product of a small town. He has made a very good record of A's, and this coupled with his participation in student activities put him directly in the row of the A. Z's. Although coming from the "parlor city" of the state, "Brick" did not begin a study of the parlors in LaFayette until his Junior year. Judging from his frequent trips to the east side, he must have gained some valuable information.

Hailing from East LaFayette, "Broek" has been working under a handicap, which fortunately has not held him down. Henry lead his classmates into the last two tank scraps in the history of the University, and has been the mainstay of the basketball team through his tireless efforts, and his consistent and accurate shooting. His ability to make friends, jovial good nature and popularity with the fair sex are nicely blended.

"E. G." hails from the hills near Martinsville, but he is entirely outgrown the effects of his original environment. In the classroom Brown has the reputation of being a hard worker and a good conscientious student. Because of the business connected with his farm, he is compelled to take frequent trips out of the city. I suppose Jersey hogs have always held a warm spot in "E. G.'s" heart, but in the future it is feared that his affections for them may be superseded by something of greater importance.

BUNKER, FRANCIS SWANK.

Frank came to us from the eastern part of the state thoroughly imbued with the fact that Pennville was the best spot on earth, and apparently he has not lost this idea, for he now has hopes of returning to the old homestead and occupying that already vacant house. Though he strove hard against it, his consistent A's told the tale and he finally fell in the snare of the A. Z.'s. Bunk's cheerful smile has made a host of friends for him here at Purdue.

CALDWELL, HARRY FRANK.

"Judy" is one of those persons who are small but mighty. Although handicapped in stature, his indomitable spirit has won him distinction in the various lines of activity from football to fusing. He is especially well informed on the subject of pork production, and can discourse at all times on the profit in raising hogs in Wayne county. At first Judy showed a strong tendency toward church socials, but constant attention has overcome the weakness. His contagious good humor has won him a wide circle of friends.

"J. D." came to us from Roachdale—"the pride of Putnam County," as he says. As a Freshman he gained a reputation as a quiet studious fellow. So quiet was he that certain boys never duly baptized him "Little Noise." Since then he has tried religiously to live up to his reputation and has succeeded very well. As a fusser J. D. did not gain the envy of the Secret Order of Fusers, but during the last two years he has more than made up for lost time. By his congeniality and ready smile John has gained a host of friends at Purdue.

After having entered Purdue without a definite aim, it took Grover just two weeks after registering to decide to cast his lot with the school across the road. It was there that he learned of the opportunities of fruit growing in his part of the state and then even "Rudolph" did not cause him to change his purpose. While the enticements of the fair sex have had but little effect on Grover, it is well known that he is only waiting to find his ideal which is a brunette of the slender stature.

The reputation of being a successful reporter on a daily paper of no mean size is "Cavy's" heritage. Along this line he will always be remembered for his articles in "The Country Gentleman" and "The Farm Guide." While still a Junior, even an offer of a lucrative position as the editor of a large farm journal was not enough inducement for his deserting us. "Joey" also has the ability to turn idle moments into money and B grades into A's.

Clarke hails from the industrious town of Edinburg, and is surely endowed with all the generosity and hospitality of that place. During his four years here he was rather reluctant as to the general art of tussing and levee drilling. Clarke has a personality which one cannot reject, but rather we accept it at its face value and feel lucky to have such a friend. His character, morals and interests in his study are above reproach.

"Babe" came to Purdue in 1910 with the idea of revolutionizing the electrical world. Finding out, as he said, that he was about to spoil a good farmer, he dropped out at the end of his Sophomore year. Upon returning to the University he changed his course and cast his lot with the Animal Husbandry men. While here he became a firm believer in Professor Fisher's theory that every man to be successful as a farmer should be married, so he has Mrs. Cotton with him during his Senior year.

"Cunnie" is a product of the hills of southern Indiana, with high ideals and a determination to do things. Ill health severely hampered him at the beginning of the Senior year, yet nothing could prevent him from making an enviable record. "J. "Davy" arrived at Purdue as a sedate little Freshman straight from the Queen City of the West. After he was here several months he turned into a grand and obtained a good start. Up to his Senior year he remained in seclusion, but now he has blossomed out and developed into a good fellow. He showed Bill Smith his ability by making the stock judging team of which he is justly proud. His favorite loafing place is in Doc Terry's Laboratory, where he delves in deep thought and scientific researches.

Campus-wide popularity combined with strong traits of congeniality in capacity for friendship, made "Dutch" a "hail fellow well met." He has always shown a heart full of school spirit and the hundreds of Purdue cheers which have resounded and reverberated on many athletic fields under his direction, alone can vie with the spirit of the leader. "Dutch" has also a capacity for clear and accurate thinking along scientific lines.

He made friends and good grades at each of these places, but did not find his ideal school until he entered Purdue. He has been here three years, and has completed more than the required work of his course. No one appreciates humor more than Ebbinghaus, but he is also a very conscientious and systematic worker. With these qualifications he will undoubtedly prove his worth as an educator.

"Eddie" joined us in the fall of 1915 after finding that he could not gain the desired knowledge of Dairy Management at Earlham, and he has been received among us as a matter of course. He soon found out, much to his displeasure, that he could not make perpetual week end "ents" without being severely reprimanded by the faculty. It can be said without a doubt that "Eddie" will not be a member of any bachelors' club next year at this time.

"Doc" has devoted the most of his four years here to the careful study of chickens—the feathered variety taking precedence. Though studious he has nevertheless found ample time to devote to other duties and has made the most of each, being always helpful, systematic, quick-witted, and ever able to see the other man's argument. Doc is one of the most cheerful and kind-hearted of the Seniors, and is noted for his unflinching good fellowship.

"Niel,"—the receiver of many various hued letters—or the man with a girl in every state—is quite a fusser. He has made good in all his work in spite of this for he has the "stick-to-it" quality, a most pleasing manner, and goes in every game to win. His specialty is growing apples, a number of which he took pride in displaying at the Indiana Apple Show this year. He is also a good church worker, and above all a good "pal."

In "Stem's" case it was the call of the Sod (as he expresses it) that called him from an irksome literary course at Hanover to that of scientific agriculture here. At once a man of level head and jovial disposition he easily escapes many of the dangers of life that lead others to disaster. Wherever opportunity may take him we wish him a pleasant and profitable life. Agriculture has acquired a recruit that will do her credit in the future.

Harry received his preparatory education at Terre Haute State Normal. After teaching four years he decided to come to Purdue where he has proven himself a very practical student of poultry and horticulture. He has the honor of being the first poultry student to win a "P" picking chickens. He has never been much of a fusser, but, according to indications, has some great attraction at Terre Haute. Serious complications may result from this attraction.

This Auburn haired Agriculturist has long since proved himself a necessity to the '16 class. A safe bet on all occasions and a true friend to a multitude, he is one of that kind which makes one feel that Purdue must have all the best men, while the other schools have to make the best of the second raters. It may well be said in this case, "A full grown man and at all times a gentleman."

"Butch" has a quiet, studious, thoroughly likeable disposition. Those who are fortunate enough to be his classmates are unanimous in being his friends. When he secures his diploma he intends to take it back to a lesser institution of knowledge, there to inspire with it the yearning for education in Purdue's embryonic Freshmen. Save for his near associations with the Pharmies there is no blot on "Butch's" name. We are certain of his success.

"Pick" started in early to make a career for himself by winning two cups at the egg show and distinguishing himself by his speech of acknowledgment. We hear that he is soon to link his fortunes with another. He has our congratulations.

Although "Liz" hails from the city, he expects to show the farmers of some fortunate community how to farm, and his record above indicates that he probably will succeed. A most versatile man, accomplished in all forms of University activity—athletic, literary and social—he has still found time to be a good student without ever appearing overworked. His style of big, bluff, good natured men, are always a credit to their Alma Mater.

MASON, ROY STALLEY,
Cannelton, Ind. "Mase"

B. S. in Agr. Teachers' Club
(1) (2); Secretary (1). Agri-
cultural Society (1).

Mason comes from Cannelton, on
the southern border of Hoosierdom.
After graduating from high school
there, he taught for three years, in
the meantime attending the State
Normal and Indiana University. He
entered Purdue in 1913, and has com-
pleted the course in three years. His
interests and his range of information
are very broad, which makes him an
interesting conversationalist. He is
always found ready to support a
worthy cause. From his scholarship
records and from his habits of sys-
tematic work, we predict that he will
achieve success. He has an excep-
tional record of achievements.

The hills of Jefferson County
never turned out a more promising
product than is our friend
"Shorty." To appreciate the
deep qualities of friendship with
this man one must know him inti-
mately. His is a typical case of
where still water runs deep.
"Matty" is a steady and accurate
worker who puts great stress upon
details, yet is not too narrow to
grasp the larger aspects of prob-
lems.

"Moe" decided he needed a little
more experience in the ways of the
world before entering Purdue, so af-
ter graduation from High School he
taught school for three years. That
such was a valuable course has been
proven by the fact that he has found
time to take part in several University
activities and still apply himself in
diligently to his studies. He is that
type of man who takes more than
the average knowledge with him upon
completing his University career.

"John R." came from New

of a better education. He soon be-
came one of the "boys" and was
ever ready for a good time. How-
ever, with his good times he has
never neglected his school work,
and has made good from the start.
Winning a warm spot in the hearts
of his fellow students and profes-
sors alike by his genial good na-
ture and ready answers has been
one of the least of his difficulties.
"Jack" will probably enter the
field of teaching.

Chase is another example of the boy from the farm who can do many things well. He has achieved success in athletics, in class affairs and in winning the friendship of his fellows. He is active and cheerful, and is one of the best known and most popular men in the class. This tow-headed youth can always be found seemingly behind some project but usually leading it.

MOOD, VIRGIL

Stanford, Ind.

B. S. in Agr. Teachers' Club (1) (2) (4); Pres. (4).

Energy and individuality are outstanding features of Mood's personality. In his teens he taught school and attended Central Normal College, receiving a B. S. degree in 1908. The same year he married and located on a farm near Danville, where, to use his own favorite phrase, he "made the thing go." In 1912 he re-entered school at Danville and after earning his second degree, A. B., he came to Purdue. He has finished the course here in three years. The philosophical and the practical are well blended in Mood.

NASH, ROBERT SMITH

Peru, Ind. "Bobbie"

B. S. in Agr.

Four years ago a bright lad came into our midst who said that he came from Peru, but he was liked in spite of the fact, and his friends have kept on liking him ever since. His bright smile has won him friends with the fair sex as well as with his fellow classmates, and his cheery good humor is an "open sesame" wherever he goes. A friendly optimism supported by a clever wit and sound judgment are factors that have blended to help him retain the position he holds. Peru will feel the power of Purdue on his return.

"M. H.'s" good nature is proverbial though he himself admits that he plans to thwart his enemies later. He makes four trips weekly to the east side with the ostensible purpose of editing the *Agriculturist*, but since one of these trips happened to be upon Sunday night there are those who have doubts as to the whole affair. Be that as it may, the *Agriculturist* grew and waxed strong under his tutelage.

"Dutch" started life at Purdue
wrong when he entered as an en-
gineer with the '15 class, but after re-
maining at home his second year he
made a great stride toward success
when he joined the Ags. of the '16
class. He did not change courses for
the usual reason as can be seen from
the fact that the Alpha Zetas captured
him after a struggle. An athlete, a
student, and an all around good fel-
low are some of his attributes.

"BILL" a LaFayette boy, certainly
knows the "ropes" better than almost
any of us. It is due to this fact to-
gether with his genial smile and con-
fidential attitude that fits him
admirably for the role of a politician.
He makes every action a prompt one
and combines shrewdness with hard
work. He and Dr. Bond have many
secrets in common, judging from
their confab. Through his talent for
music, the "Singing Horticulturist" as
he is commonly called, has lent much
toward the success of musical orga-
nizations here.

"Moze" is a product of the
West Side high school. He has al-
ways been in for a good time, but
through all he has stuck close to
the straight and narrow way.
As a Freshman nothing came
between him and his studies, but
he gradually drifted away until
now one would think that he
was at the other extreme if it
were not for the grades that he
brings home. "Ross" has often ex-
pressed his appreciation of the
fairer sex, but he has not pickel-

"The Governor" is a man with
the patience and perseverance to
get to the bottom of things worth
while. Being a most industrious
man, he leaves behind him a class
record that few have equaled. He
is of a firm belief that Southern
Indiana needs more Purdue farm-
ers and the following years will
find him taming nature with the
sciences of agriculture that he has
mastered during his four years
here.

Bert taught country school for a
year before coming to Purdue but he
gave this up in order that he might

knowledge. Light on his feet not-
withstanding his two hundred pounds
of "solid comfort," with rosy cheeks
and ever smiling face, Bert has al-
ways succeeded in attracting a great
number of friends (also a wife)
from among the fairer sex as well as
from his classmates. Underslung and
slow moving, Bert gets there just the
same.

After making the quiet little ham-
let of Otterbein famous, "Roudy"
came to see what Purdue had in store
for him. Upon arriving, he found that
the best thing for him was a course
in agriculture and he soon became
famous as the best curve platter on
the farm. He can be heard most
any time during the day or night,
saying, "Don't call me Roudabough."
Between the job as treasurer of his
class, studying his week's work on
Monday night and the game of fuss-
ing, he has had a little time to par-
ticipate in class athletics.

An efficient man in all respects is
Laird. The *Exponent* has prospered
greatly under his management and

lies in the fact that he will not go

"J. T." is a quiet and unassuming
fellow, always tending to his
own affairs, thus making many
friends. While here the co-eds
never proved to be any attraction,
but an occasional visit to his former
home in Northern Indiana would
lead one to believe that some fair
dame awaits him there, and some
day he may be found residing in
the great West engaged in his in-
tended occupation, farm manage-
ment. In school work he is al-
ways found where work is to be
done. He never prides himself as
being a shark, but is graduating
with some worthy achievements to
his credit.

"Scottie" is a good soldier and his soldier-like attitude is evinced in everything that he does. Showing a determined and vigorous front to everybody, yet not a forbidding one, he has quietly and consistently gone about his business, ever securing the best of results, but never boasting of his accomplishments. He is altogether a very likable chap.

SHIVLEY, BARRETT

Spencer, Ind. A. P. P.; A. Z. "De-Breeze."

As an ex-14 man, Barney was a city product but as a graduate with the 1916 class he is a thorough agriculturist, due largely to the fact that he went back to the soil for two years. As a member of the DEBRIS staff, "DeBreeze" was "faithful to the hush." His combination of executive ability and sunny disposition is equaled in few. His scholastic ability was early recognized and Alpha Zeta honors came his way.

SHRODE, WILLIAM EUGENE

Rockport, Ind. "Bill."

B. S. in Agr. Varsity Club (3); (4). Agricultural Society (2) (3) (4). Jeffersonian (3) (4); Treas. (3). P. A. A. (1) (2) (3) (4). Baseball Varsity Squad (2) (3) (4); Won "P." (2) (3) (4). Won Class Numeral (2) (3).

"Bill" sprang into prominence in his Sophomore year, when Coach Nicol discovered his ability as a baseball pitcher. The victory at Bloomington in 1914 was credited to his arm. Although often accused of sleeping in classes, he has maintained a good record. He is a large-bodied, whole-smiled farmer and is deeply interested in the relatively new field of Agriculture—farm management.

SHUTER, CHARLES W. SHUTER

Aurora, Ind. "C. Spangol."
"Bull Dog."

B. S. in Agr. Dairy Club (4); (4). P. A. A. (1) (2) (3) (4); Wrestling Varsity Squad (3); Won Class Numeral (3).

"C" or Shuter as he is better known, hails from the little town of Aurora. Shuter has been a consistent and a hard worker. Although he sleeps slowly and is therefore slow to wake up in the morning, he has plenty of momentum once he gets started. While in Purdue, Shuter has shown a bull dog spirit, manifested by grit and determination and he never gives up until the row is finished. He does not "fuss."

1916

SMITH, FRED C.
Indianapolis, Ind. "Smitty"

B. S. in Agr. P. A. A. (2) (3) (4).

Broad Ripple, which "Smitty" declares is near Indianapolis, lost a valuable citizen when he hit the ties for Purdue with a high school diploma in one hand and a Sunday shirt in the other. His appreciation of a college education is emphasized by his "concentration" while at study, but when anyone starts a rough house he is always at home on the bottom of the pile. Yet his admirable qualities make us feel sure that in the field he will always be found on top of the pole. Broad Ripple will then become famous.

SNYDER, WILLIAM PERCIVAL
Greensburg, Ind. "Bill"

B. S. in Agr. Y. M. C. A. (1) (2) (3) (4). Agricultural Society (1) (2) (3) (4). Jeffersonian (4). P. A. A. (2) (3) (4). Purdue Battery (4).

"Bill" completed his development into a mature man some time after coming from Greensburg. From the first he has shown himself to be a most able student belonging to those who "while others slept have toiled upward in the night." Although "Bill" isn't one of the noisy kind, words do not fail him when needed. His concise but appropriate expressions reveal to his associates that he has taken advantage of several things at Purdue.

STANLEY, LAWRENCE WEESNER,
Wubash, Ind. "Stan."

B. S. in Agr. Agricultural Society (1) (2). P. A. A. (2) (3) (4).

Stanley started his college career at Earlham, but after two years there the Saturday Evening Post's "Back to Nature" series convinced him that his calling was on the farm and that Purdue was the place to receive the best knowledge upon modern farming methods. "Stan" is quiet and rarely speaks unless spoken to—the requisite of a thinker. He is a hard worker but likes to mix a good time with his labors in the right proportions.

STONE, WILLIAM EDGAR,
Gosport, Ind. "Doc." "Piecy."

B. S. in Agr. Teachers Club (3) (4). Y. M. C. A. (1). Agricultural Society (1) (4). P. A. A. (1) (2) (3) (4). Won Class Numeral in Football (3) (4).

"Doc" is a resident of the wilds of Monroe County. Although encumbered with the name of our President, "Doc" has made good and upheld the name of his superior. He is a hard worker. His ready wit and good humor have won for him a warm spot in the hearts of his friends. "Doc" will enter the field of agricultural education and intends to apply his education to bettering farm conditions.

STOOPS, JOHN WALKER,

Terhune, Ind. "Shorty"
"Judge."

B. S. in Agr. P. A. A. (1) (2)
(3) (4).

"Shorty" hails from Terhune and has the distinction of being the first one to enter Purdue University from that Indiana oasis. He saw the need of the application of the principles of scientific farming at home and no doubt will profit much by his education. He has won an enviable place in the hearts of his classmates by his loyalty and good humor. He has many friends about the University, among both students and faculty; Professor Ransom and he being almost inseparable companions.

"Julia." "Rusty."

B. S. in Agr. *Exponent* Staff (3); Varsity Football Squad (3); Won "P. R." (2); Class Basketball Squad (2) (3) (4); Won Numeral (2) (3).

"Tommy" has been in our midst for four years during which time we have come to know this lad for the sterling qualities that he has. With a fine sense of fairness and good judgment in deciding for the best things, he is amply prepared intellectually to cope with the hardest that life has to offer in the future. "Tommy" says that he intends to enter the agricultural field upon graduation.

LEWIS, OTTO PHILIP,

"Bear's" reputation as a track man was further enhanced after entering Purdue when he was elected as captain of the 1916 track team. Due to his undeniable qualities of great organizing ability and a large talent for music he has gradually transferred his athletic inclinations and energy to promoting musical organizations. Many remember with pleasure the success that has crowned his musical efforts along this line.

FORSYTH, THOMAS SYLVESTER,

"Tommy" was not long in getting started after coming to Purdue. Wherever he moved there was always evidence of his efforts, and as his sphere of activity steadily grew, in his retrospection he can view an enormous amount of work efficiently done. His sound judgment and wholesome attitude made him a man whose opinion was sought and valued.

George had his preparatory educa-
tion at a town called Otterbein and
on finishing that he decided to enter
Purdue and take a course in Chemical
Engineering. After three weeks with
Bill Turner and Sauerbering, he de-
cided that his calling was not that
of a Chemical Engineer but that of
an Agricultural instructor. George
has many accomplishments, the most
important being that of an impersona-
tor, as he sometimes impersonates
work by working an hour or two on
Monday nights and in doing so gets
his studies for the week.

If there is anything in having a
good start in life, Gilbert is for-
tunate in this respect. Being the
young ruler of a clear and mature
mind with a remarkable memory
and high ideals, he not only
financed much of his college career,
but also became a participant in
several student activities. His
conscientious attitude in the class
room at all times contributed much
to his credit. The A Z's got him
early.

WEATHERLY, FLOYD.

Four years ago Weatherly came
to us as a Freshman after having
taken preparatory work in the In-

his way through school not by be-
ing a shark but entirely through
persistence. He is steady, reliable
and conscientious and always on
time, all of which qualities com-
mand a premium on the employ-
ment market. His diversified ex-
perience is a basis which causes
his friends to believe that he will
come into his own.

Fresh from a year in the Father-

tall, lanky Frosh with a head pos-
sessing spiky hair and a wonder-
fully efficient "thought factory."
The curriculum has been for him
a vain attempt of the faculty to
provide mental fatigue. His make-
up is a rare combination of the
methodical and carefree. He will
be remembered by his classmates
as a good fellow with a helping
hand and a heart in the right place.

Huntington, Ind. "Bill."

B. S. in Agr. Horticultural Society (4). Dairy Club (2) Agricultural Society (1) (2) (4). P. A. A. (2) (3) (4) Wrestling Squad, University Champion (1).

"Bill" came to us via I. U., but was sadly disappointed to learn that credits in education were entirely useless in the Ag. course. However, he remained. With an attentive ear in the class room and an occasional shy glance into his text books he has succeeded in picking up quite a collection of ideas. Bill early made his debut into east side church society for reasons best known to himself, and, to our knowledge, still goes.

B. S. in Agr. Dairy Club (2) (3) (4); President (4). P. A. A. (2) (3) (4).

"Ben" blew in from the capital city by way of Earlham with the characteristic dash and audacity of the city product. After breaking the first ice of obscurity he steadily came into his own as an influential member of our class. His deep insight into practical affairs, his ability to grasp a situation, and his general all-round qualities make him a man we like to know. "Wilson's Pride" brand of condensed milk will be produced when he starts commercial work.

WOODCOCK, JAMES FRANCIS

"Jim." "Jimmie."

B. S. in Agr. Dairy Club (3) (4). Agricultural Society (1) (4). P. A. A. (1) (2) (4). Battery (3) (4).

Woody brushed the dust of Connersville from out of his trouser cuffs and came to Purdue to secure higher education. Woody's control is admirable as he was able to take his doses of Ag. without any outward signs of disgust. "Woodie" is known to the faculty as a good student, and to the West LaFayette business men as a hustler. If ambition and effort are symptomatic of success he will surely make good.

WRIGHT, ALBERT HAROLD,
Logansport, Ind. "Hussy."

B. S. in Agr. Horticultural Society (4); Treasurer (4). P. A. A. (1) (2) (3) (4).

"Hussy" appeared on the Purdue horizon as a tow-headed youth with a trust magnate figure, a never-failing sense of humor, and a remarkable propensity for painstaking work. His Addisonian vocabulary and esthetic inclinations encourage us to suspect him of undeniable erudition. Horticulture is his goal and his friends say that he will arrive on schedule. He has no bad habits that we know of as he is able to prune trees without "cussin'." A goodly youth withal.

YODER, LESTER.

Shipsowner; Ind. Agathon Club.

 Carlyle (2) (3) (4); Sec. 3; Pres. (4). P. A. A. (1) (2) (3) (4).

Yoder is one of those steady, hardworking, conscientious fellows, whose real worth is only realized through intimate acquaintance. His quiet and unassuming manner and serious and business-like attitude cannot but impress anyone who comes in contact with the man. He has applied himself diligently to preparing himself for his life's work. His methodical and regular habits coupled with a mind naturally analytical and capable of grasping small details especially fit Yoder for a chemist.

History of Chemical Engineering

ALTHOUGH the youngest school in the University, Chemical Engineering is growing up very rapidly. Purdue is numbered among the pioneers in Chemical Engineering in this country; the first announcement of the course appeared in the 1906-07 catalogue, the first graduate received his diploma in 1910, while the School of Chemical Engineering as such was founded in 1911, with Professor H. C. Pfeffer as head.

The foresight which prompted the entry of this institution into a field at the time largely untried, and the wisdom with which the foundations of the course were laid, have both been justified in the very satisfactory growth of the school and the reputation which it has already earned.

While the present European crisis has emphasized the dependence of the world on the chemical industries, and intensified the demand for men trained to enter these lines, the general development has for some years been in this direction and the heavy demand for men with chemical engineering training will probably continue for some time.

The course as laid down, consisting of fundamental subjects in Chemistry, Civil, Mechanical and Electrical Engineering, is administered through the various schools and departments of the University, bringing the students into close association with the varied phases of engineering and supplementing the broad foundations upon which the course is laid.

Graduates of this school are not specialists in any sense, but are exceptionally well prepared to specialize along a wide variety of lines, which not only increases their chances of success, but their effectiveness in business, scientific or technical pursuits.

Starting out a few years ago as a servant of Uncle Sam, "Dook" became obsessed with the idea that he would become a chemist. Accordingly he gave up a good job, bade his friends goodbye, and plunged into the sea of chemistry. Instead of being overwhelmed he lives twenty-four hours each day in chemistry; eats, drinks and talks it—and not finding enough in Butler College and Purdue, spent his last year hunting through LaFayette for more of it.

Being born a typical German and with all the facial characteristics of an Irishman is the unusual lot that falls to "Shorty." That does not seem to handicap him, however, for he takes a place right up in the front rank with our active Seniors. He is a good, clean, wholesome chap, who can adapt himself to circumstances however stringent, and is one of the best that we have to offer to the world.

"Mac" started his campaign in search of knowledge four miles from Purdue and says that he is proud to end it here. He graduated from State Normal in 1913, receiving a degree of B. A. in pedagogy, entered Purdue that fall and has been a consistent worker most of the time. At times he seems a bit erratic, but otherwise his high personal qualities recommend him to us all. A slight impudiment in speech does not materially silence him.

"Snooks" belongs to the six foot club, has the right ideas in regard to a complete education, and has never permitted studies to interfere with his social duties. Never happy unless he is being entertained by some fair maiden, he has been famed as a fuser since his freshman year, but like the March winds his affections have changed directions many times during the year. "Mac" is a fine musician and a standby of the Purdue band.

When Edmund first came to Purdue he told his fellow classmates that it was not because of his love for chemistry that he was taking chemical engineering. Because of this fact he at one time was admitted to membership in the Chemical "Sea" Club. His connection with this organization caused certain of his professors to believe that they "had him," but he deliberately fooled them in his graduating with the rest. During the last two years he has made a couple of trips to Attica, for some unknown reason.

"Pete" entered Purdue as a sophomore, more chemical engineer than student at Miami University. He is a student that his second choice was not wise and the Old Gold and Black crew also rightly consider herself fortunate in his selection. Everyone knows "Pete" as an athlete, but only his closest friends can appreciate him for his kindly disposition, consistent and persevering and winning personality. He is too broad minded to follow the phrase at the press to make him contented.

His thought of returning to Russia has long since changed to a desire to devote his abilities to civil service for this country. He will become a citizen of the United States and will make a valued acquisition.

She Must Have Been a Co-ed

Was there a gleam within the eye
That sparkled up, so coyly shy?
She must have been a co-ed.
Was there a dimple in the smile
That lingered the semester's while?
She must have been a co-ed.

Was there a laugh within her voice
That fitted rarely to your choice;
Was her's a form of elfin grace
That seemed unfit for earthly place;
Was her's a face so lovely, sweet,
Your heart went straightway to your feet
To follow ever on and on
Along the pathway she had gone?
She must have been a co-ed.

Was there a twinkle of French heels
Adown the sprightly ball-room reels?
She must have been a co-ed.
Was there a dainty stemmed glass
In dainty hand as toasts did pass?
She must have been a co-ed.

Was there a gown that charmed the sight
With its exquisite, fair delight?
Was there a memory of hours
As fragrant as the sweetest flowers;
Was there a dream in your cigar
Of things that were—not things that are;
Was there a memory you kept
When others died and others slept?
She must have been a co-ed.

History of Civil Engineering

THE School of Civil Engineering as it now exists was established in 1887. The first class was graduated in 1889, when ten men received their degrees in Civil Engineering. Since that time the school has grown rapidly and numbers among its graduates some of the foremost Civil Engineers of today.

The new Civil Engineering building, erected in 1906 at a cost of \$48,000, provides excellent quarters for the engineers. The equipment for field work includes a collection of transits, levels, plane tables, compasses, and other equipment for higher surveying and observation of stars. A large drafting room is located in this building, the Materials, Testing and Hydraulics Laboratories being in the Engineering Laboratories building.

Dr. W. K. HAYS

At Purdue the field of civil engineering is divided into the departments of Hydraulic, Structural, Sanitary, Railroad, and Highway Engineering and Materials of Construction. The responsibility of the development of each of these departments is fixed in an individual professor who is encouraged to become not only a teacher but also an experienced practitioner. Practical field work is provided during the Sophomore year in connection with the study of text book

and is extended into the summer months for six weeks. Last summer the camp was located at Pentwater, Michigan. The students measured the angles of a triangulation system and the length of a base line, and on this framework they carried out the topography and hydrography of the surveys. Also surveys of railway and highway location were made and the students were taught to stake out construction work.

The graduates of Civil Engineering are prepared to take up immediately and with capability the work of a practical engineer in the average community. They are encouraged to take up work in Indiana, and a large number of them find employment with the engineering departments of railroads and in the designing departments of construction companies. A study of the alumni register shows a large part of the graduates of Civil Engineering are now engaged in the actual practice of the profession, especially in bridge construction, railroad work, and general building construction.

The school of Civil Engineering has been especially active during the past several years in the work of Engineering Extension in the State. The professors have given service as engineers to various communities throughout the State. A short term school in engineering for county commissioners, county road superintendents, county surveyors, and city engineers has been held each year for the last three years. Its aim is to be of service to the commonwealth by advancing the engineering knowledge of the men actually doing the work of the State.

"Bake" comes from Orleans, which he claims is the metropolis of Orange County. We are not sure that it can be called a metropolis. "Hap" is a living example of the motto, "A right time for everything," for when he does study no one can pull him away to frolic. After he has completed the task for the next day he is ready for the frolic—if it is not too late.

"Monk" had a running start on most of us, as he lives in LaFayette. Knowing well the inside of student life he at once became one of the best known men in the class. As a student he is inclined to take things easy and he is found at his best when backed into a corner. An original thinker, he has visions of building a great structure and has the determination to carry through anything which he might originate.

**HUSNES, JOHN RICHARD,**

"Dick."

B. S. in C. E.

Initiation into the precepts and principles of Notre Dame did not spoil "Dick" for us but rather helped him, in that his first two years here were a pleasant dream unclouded by scholastic worries. It would be hard, if one were to make a canvass of the entire campus, to find a person able to keep up in his work and still spend so much of his time abroad as does our friend "Dick." We know that as a civil engineer he will "do things." He will work hard when put on any job.

Since his advent at Purdue, "Dobbie" has won many friends and made few enemies. He has often been accused of being the biggest "kid" in the class, but with all his effervescence of spirit he has always been found a steady thinker. During his career here, "Joe" has been a ladies' man extraordinary, with a general leaning toward co-eds. Results promise another proof of the great value of co-education.

Coming from far off Stuttgart, Germany, with quite a reputation as a military horseman, "Fritz" entered the '16 class in its sophomore year. His ability to grasp new and strange ideas has been marked. His friends have found him a clever student, the best of company and at all times a gentleman. A "mighty fine fellow" expresses the general sentiment of his friends. He will be situated at Culver Academy upon his graduation.

Although he does not admit it, his favorite exercise is slawing. He is very fond of the ladies but as yet they have not taken him seriously.

"Mose," it seems, is a firm believer in the conservation of energy, yet he never has found it hard to "get by." His proficiency in drill has made of him an expert early-morning-levee-hiker; which no doubt accounts for his ever-present breakfast groutch. Perhaps his greatest asset, however, is his ability to make up for those sorry moments with his keen sense of humor.

Otto came to Purdue with a "rep" but he soon decided to rest on his past laurels so he set about to fool the professors, which task he apparently did by getting by without working. Athletics took him by surprise in his Senior year in the form of football and cheers for "Belgium" are often heard from fellow Seniors. Otto will seek his fortune in the far off jungles of South America. We are sure that he will find it.

He always comes to be as congenial and friendly as possible with all the boys and if they meet him half way he's the best friend any one would want. Formerly his favorite girls were from Broadway but lately his friends are inclined to think he has found a charming one in the near vicinity of the campus.

He doesn't chew, drink or smoke, but indulges in other forms of higher education, such as the "movies." Willingness to serve, together with a happy disposition will make him a valuable man for Uncle Sam as well as the little lady at home. We are sure of his ability.

"Shady" believes in the theory "What others have done, I can do." He is a little slow moving but he will get there. He first entered with the '09 class but due to the lack of shekels he quit school and came back to the '16 class and has decided to graduate with us. He can make all snide with his timely remarks and his friends just could not get along without him. Purdue loses and the world gains when he graduates.

"George" came to America in 1909 and entered Cook Academy, Monticair Falls, N. Y., where he graduated. He then spent a couple of years in the universities of Wisconsin and Illinois. In 1915 he entered Purdue as a Senior. He sees the present needs of his country and he is now specializing in sanitary engineering in order to meet this urgent demand. He claims to be a real sanitary engineer and desires to be a sanitary expert. With his wide college experience he should be able to make a success of the line of work he has chosen.

Girls and pocket billiards are his favorite pastimes. In short, he is a live wire, a man of ability and a friend of rare worth. This combination of virtues should be a short-cut to success and "Jonesty" will undoubtedly be in the top rank.

Traditionally speaking one might say that a good man hails from Broad Ripple but that not all men from Broad Ripple are good, but in this case at least the major premise is correct. Not a student of the first water, "J. P." is, however, a man of excellent habits, always on time; and when it comes to strictly engineering problems his latent talents really show themselves. Success to you, Arthur; we know what we can expect from your time spent at Purdue.

He began his career here as an electrical engineer but in '13 decided that he would be better suited for a civil engineer. He is an ardent admirer of the feminine sex and his frequent visits to North LaFayette are quite noticeable. Having shaken off all bonds of mechanics and severed the ties of Dutch, he was able to reach the last stage of his education at Purdue in safety.

Although at all times a very busy person he never fails to lend a helping hand to one less fortunate than himself.

PURDUE UNIVERSITY

History of Electrical Engineering

ELECTRICAL engineering was first recognized at Purdue University in 1888 when a course was created as a branch of the School of Mechanical Engineering. In 1891 the present electrical engineering building was constructed and was for some time occupied by both the School of Electrical Engineering and the department of Physics. With the later construction of the Physics building the School of Electrical Engineering made use of the entire building which it now occupies, extensions for a large lecture room and laboratory having been added in the meantime. The building and equipment for this school is now valued at \$97,000.00.

The course in Electrical Engineering has been greatly improved during this period, the first two years being devoted largely to the subjects of mathematics, science and shop practice, upon which all successful engineering is based, followed by a thorough training in the fundamental principles of electricity and magnetism and their applications to electrical engineering practice. Recently more electrical work has been introduced into the Junior year and a required course in corporate organizations has been provided in the Senior year. This has been found necessary to meet the demand for a knowledge of the fundamental principles of financial negotiations resulting from the recent tendency of

PROF. C. F. HILDRETH

technically trained men to enter commercial and executive positions. Specialized courses in electrical railway, illuminating and telephone engineering as well as advanced work in advanced theory are available for Seniors.

Recent developments in the use of high voltage for the transmission of power have found Purdue University better equipped than any other school in the Middle West with high potential laboratories and experimental transmission lines. Studies which are now being made in this pioneer field have received prominent attention in the proceedings of technical associations throughout the country. Just at present the very aggravating problem of interference between such high voltage lines and telegraph and telephone systems is being studied in considerable detail. High voltage apparatus is being tested for both manufacturers and operating companies.

The electric railway test car has recently been equipped with a full set of recording instruments and is used for instructional work, research investigation and interurban and city railway tests. The present wireless telegraph station is this year being moved to larger quarters and being fully equipped for further studies in this important branch of the profession.

The personnel of the instructional corps of this school made up of thirteen men conversant with the practice as well as the theory of the various branches of electrical engineering is stronger than ever before in the history of the institution and many of the faculty are also engaged in assisting the various manufacturers, utilities and individuals throughout the State in electrical problems, appraisals, rate determinations, etc., not to mention the engineering research being carried on in the various laboratories.

Purdue is only the culmination of Bajour's college career, for when he came here he had two years of collegiate work to his credit. He has always been well known around the university as a man of many friends, and his early connections with a few of our student activities show his loyalty and his spirit. "Ev" is energetic, determined and congenial and he fosters only those traits that make for sterling manhood and friendly regard.

Deciding to become an electrical engineer, Darwin came to Purdue in the fall of 1912 and since then has absorbed a goodly store of knowledge, although at no time has he allowed his school work to interfere with his social activities. His popularity among the fairer sex, along with his clean habits and neat appearance, have won him the name of "Ladies' Delight." A "Linger Longer" habit, early acquired, has often caused him to hike the levee in the wee small hours of the night.

"Willie" began his college career by a one year's residence at that mecca of classicism, James Millikin University, and then after a year's rest decided to enter more difficult fields. Time has shown us that he has made good on the campus although not without a good deal of hard work. "Willie" does not believe in devoting his entire time to one line of endeavors, however, and has accordingly divided his time between the class room and several student activities which he has carried through successfully.

"Tom" will always be remembered as one willing to share anything he owns, and the fact that "it" was on him, rather than on the other fellow, never spoiled his enjoyment of a good joke. His pet aversions are German and alarm clocks, while, on the other hand, not even a suggestion of something to eat will draw his attention when he has settled down to a new "Saturday Evening Post." His ready adaptation to conditions and his habit of always looking for the bright side of things are valuable assets. His opinions, however combative, are usually worthy of consideration.

Cady is a product of M. T. H. This classmate's unselfish nature has been a great asset to him while at college and will continue to remain such after he has left us, wherever true worth and ability receive proper recognition.

CHOW, JEN.

Tungyantung, Kichow, China.

B. S. in E. E.

"Chow" is an exceedingly quiet and reticent Oriental as might well be expected. If you have the good luck to know him well you will find behind his stoic countenance a keen appreciation of humor and a mind easily capable of distinguishing between essentials and non-essentials. His worthy ambition is to devote the results of his education toward the betterment of his country. The gain of the land of his birth will be our loss, when he returns to China.

P. A. A. (1) (2) (3) (4).

"H. F." as he is usually called, is of quiet and reserved deportment. His motto, it seems, can be expressed as, "In silence there is wisdom." He is a man in every meaning of the word, and we shall look to him in the future to do a man's work. Herman is not the sort that one will pick out of a crowd at first sight; he has not that bold, daring and rather gaudy appearance; but if you exchange a few words with him and note how deep is his thought, you would immediately place him in the rank of the winners.

CRAIG, ALBERT GOULD.

Maryville, Mo.

B. S. in E. E. A. I. E. E. (4).
P. A. A. (1) (2) (3) (4).

Craig hails from some wild place in Missouri, and he has well preserved the reputation of the "show me" state during his stay at Purdue. Notwithstanding the fact that he says but little, his is a case where still water runs deep, and down beneath his quiet reserve exists a great power for doing things. Just what Craig will do when he leaves Purdue is a hard proposition to determine for, although he is an engineer in good standing, he has always maintained that Ag. was the "only" course. The farm may yet claim him.

"Choppie" is an exceptionally good fellow, always in for a good time and never happier than when he is in the midst of a heated argument. He is a student well above the average but to use his own words he "doesn't believe in sacrificing his education for his studies." His personality and business acumen have made him much in demand. He has made many friends during his sojourn and all unite in predicting success for him.

Fve came to Purdue with a fine reputation as a track man, which he has nobly upheld by making the varsity and winning his "P". Floyd is an honest, reliable chap who doesn't hesitate to tell you frankly what he believes. He is a popular man among his fellows. He will not permit his college course to interfere with his physical welfare but, on the other hand, can't be led away to leisure before he finishes what he has to do.

Although "Garry" claims that West Virginia has the best natural resources in the world, it could not furnish him the education along the lines he desired. His second year has proved to be the bananer one for him, for he met the one girl that winter. Contrary to most cases, his scholarship improved. "GARRY" has always taken deep interest in his electrical work, and his natural ability along that line bodes well for his future success.

however, his attention has been
partially turned into other chan-

"Chas." is one of those unassuming chaps who are not much given to tooting their own horn, but for whom a host of friends will always be found to toot it. He makes friends easily, never loses any, and although seemingly never overworked, always has an excellent scholastic standing. It has been unfortunate that he has not had time for varsity baseball, as his work with the class teams has shown him to be one of the best in school.

"Opps" is one of the favorite sons of Akron, which he says is the capital of the world. Charley went one year with the '15 class, but some attraction at home held him out one year, and since returning he has received a letter every day. Although he is a hard worker and flunked Agronomy (21) he may be seen on the front row of the Family twice every week.

Kline is best known for his musical talent. He is a prominent member of the orchestra and chief musician of the band, filling the offices in the true meaning of its title. "K" won his numeral in football and never misses an athletic contest. He is a good, honest, reliable student, a wide reader, and greets all with his characteristic smile. He is one of the best hearted good fellows of the class.

"Alex" entered Purdue in the fall of 1912, after having been a Freshman at Wisconsin for a whole year. He has been doing conscientious work in electrical engineering considering the time he has spent across the river. This habit dates back to his Freshman year, although the flood somewhat hampered him at that time. He has had several years of practical experience, which, coupled with his University work, will make him a valuable man in the future.

"M. V.'s" advent at Purdue began after he had completed the course at Indiana University in 1913. He intended to graduate with the '15 class but the '16 class seemed to cause him to change his mind. Since his stay here he has become one of the firmest boosters for old Purdue. He has had to look out for himself and almost any day he could be seen on the campus in overalls and cap. We hope that this experience will aid him in his future work.

LAUDER, HAROLD WATROUS,

Binghamton, N. Y. Φ K Σ . "Jimmie." "Chief."

B. S. in E. E. A. I. E. E. (1) (3) (4). Glee Club (3).

"Jimmie" came to Purdue from that broad and beautiful state of New York, and he still admits that it is one of the best states in the Union. In the last two years he has become quite an adept at fussing; but in order that this might not take too much of his time, he has now confined it almost entirely to Sundays. His idea of contentment and a good cigar are synonymous. Never lacking in characteristic wit, thorough in all undertakings, and entirely unreserved, he has made many friends.

Anderson, Ind. Φ K Σ . "Hub." "Ekert."

B. S. in E. E. A. I. E. E. (3) (4). P. A. A. (1) (2) (3) (4).

"Ekert" is a congenial man and although a bit shy when he came to us he has developed into a man of force and sound judgment. His shyness merely hid the fact that he did not want to show too much knowledge as a Freshman. We feel that his energy and Purdue training will land for him some day an enviable record as an Electrical Engineer, to which end he aspires. It cannot be otherwise.

MCKINLEY, VICTOR L. BORDEN,

"Mac," quiet and accommodating, is that type of fellow you can't help but like. In addition to his school work he spends a large part of his time on a book called "Letters I Have Written," which is at present incomplete. In some mysterious way he conceived the idea of higher education and came to Purdue where he has shown that he is willing to work for what he desires. As an electrical engineering graduate there is not a doubt but that this higher education will show results.

"Mallet" is the Withur Scholar of the 1916 class. His combination of ability and perseverance has earned him over many distinctions.

"Flannal" hails from the great city of Brook made famous by George Ade as well as by himself. He entered with the '15 class, but owing to unfortunate circumstances he was forced to cast his lot with us. "Flannal" has been a very hard worker working the professors as hard as anyone—and has been prominent in many student activities, being a charter member of the "Gimme Club" and the Senior electrical "judging team." He will put in practice the theories learned during his stay.

"Middle" began his higher education at home in Kentucky State University, but the ambition to wear corduroys in Purdue became so strong that he broke away and came to us three years ago. His main object in the social line seems to have been to win the good will and friendship of all he might meet. Success has surely been his in this respect, for his southern geniality has gotten for him all that any man of his character may desire. With his other qualities, "Mid" has also been a good student.

Miller, commonly known among his classmates and friends as "Curly," hails from the windy city of Rochester. He is a serious, honest, hard working student, who is trying to fathom out just what the design department means. The only bit of crookedness he was ever known to be in, was to hold hands until 11 o'clock, come home, stay up until 4 o'clock to finish writing a book on relay controllers, sleep through economics, and then tell Professor Esty that he was sick.

"Nick's" outstanding characteristics are his red hair, serious countenance, and unflinching good humor. His difficulty in mastering a subject is more than repaid by his capacity for hard and conscientious effort. Professionalism kept him from the varsity pitching staff, but he has been the hero of many a class game. Probably his greatest problem will be to decide whether he was intended for an engineer or a baseball player. Baseball may be the choice.

After several years spent in commercial life, he recognized the value of acquiring the complex theory of senior electricity and returned to Purdue this fall for that purpose. His congenial disposition and personality have already won for him a host of friends among his classmates. His smile is properly speaking a broad grin emphasized with ripples, dimples and incidentals. "Dutch" didn't belong to our class originally, but he's one of us now.

SHUCK, ROBERT FREDERICK.

"Bob" entered Purdue with the '15 class, but having spent a year outside will complete his work with the '16 class. His honest, straightforward manner has gained him a host of friends. Bob has a wonderful ability to reason out problems and he will make an engineer who can go on the job and get results. Throughout his four years at Purdue, he worked every evening from ten p. m. until two a. m. and deserves special recognition for having made his own way through school.

SCOTT, FRANK,

B. S. in E. E.

It goes without saying that "Scotty" is one of the most popular men of the '16 class, although he has been with us only during his Senior year. "Scotty" started with the '15 class, but after completing his Junior work he spent a year with an electric company. During this interval of his school career, he earned quite a reputation. There is no doubt that "Scotty's" natural ability coupled with his congenial and winning ways will make him a pronounced success in whatever he undertakes.

When it comes to having the best of habits "Smooty" can not be surpassed and his only form of dissipation is his desire to enlarge his already large feminine acquaintance list. In many ways George has shown that in his ease, ability and hard work go hand in hand, and as Student Treasurer and Football Manager he has been an unusually successful.

Irwin can tackle the ivories to perfection. It was one of his delights to sit at a piano and play any ragtime that a fellow student might mention. "Hap" drew a sigh of relief as he closed his mechanics book for the last time. It was rumored that one night while asleep he turned on the light and after manipulating said slide rule he was heard to murmur "Seventy and two tenths per cent."

He has always done good work in class and has proved himself a worthy member of the 1916 class.

Up until the beginning of his Junior year "Bill" was a perfectly normal young man. After that time all he did was to work and write letters, which received the same Elkhart address. His hobby was wireless telegraphy, and during many of his spare minutes he could be found with the receivers over his ears eagerly listening to the weather report or finding out how hard it was blowing in Portland. During cold weather "Bill" slept in all the clothes he had and all he could borrow from his room mates.

Stout is one who has had the courage to start through a university with only a few dollars in his pocket. Although spending four or five hours a day at outside work, he soon acquired a scholastic standing among the best of the class. He is not only a good student but can get music out of most any kind of an instrument; plays a good game of tennis, and is an ardent hunter and fisherman. He has hundreds of staunch friends who will remember him.

"Bob," or "Stew" for short, is one of the older members of the class, and hails from the clay knolls of Carroll County. The work in Marion Normal College and practical experience as linesman, convinced "Bob" that he ought to become an electrical engineer. He has been a very hard worker and has successfully tussled with "Mike" and mechanics. During the present year he has had some terrific encounters with "chules of flux" and "Stills."

"Wap" came to Purdue with the idea of becoming an electrical engineer. The country life had become monotonous and the Ag. course did not appeal to him, so he took to a real occupation with the city. He began his labors with the '15 class but for some unknown reason he decided to join a good class and so cast his lot with the rest of us. He has always stayed shy of the fairer sex about the university, but nevertheless he has always had a wide range of correspondence from parts unknown.

Mark has shown us that it is possible to go through Purdue without being a perpetual grind and is an exponent of the theory that much more knowledge can be gained in the classroom than in preparation. We have all found him to be a very quiet and likeable fellow with splendid ideals and the courage and determination to approach those ideals. We feel safe that in him we have a good representative of our school. It has been a great pleasure to many to know him.

Glenn's greatest weakness is his love for dancing, and his habit of dancing a "strught" or nearly "straight" program with a certain girl. The one of his many good characteristics which stands out most prominently, is his honesty and straightforwardness. This is best shown by the fact that he would rather say he did not know than to try to run a bluff. His ambition is to manage the business of a small power company.

He has shown keen intellectual ability combined with a wholesome quality of good common sense at all times.

"Lefty" has been hanging around Purdue all his life, and as a matter of course he came here. Although quiet and unassuming, nothing of electrical engineering interest gets by him. He has gained quite a reputation as a fusser, but it may be observed that even this weakness has in no way interfered with his curriculum.

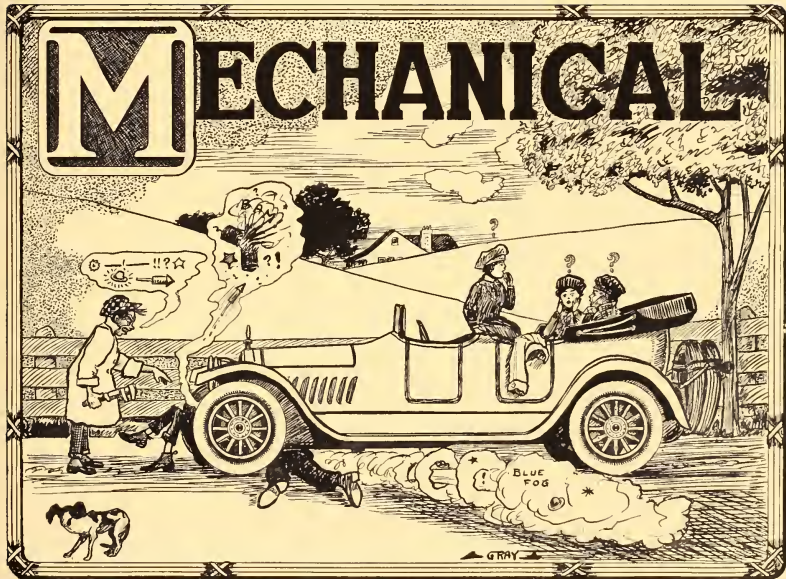

A REQUEST

Not power to change the destinies of fate,
Nor make the thousands heed my slightest call;
I ask a simpler thing, but one as great
To know my heart sincerely, that is all.

Not eyes whose gaze a lustful orbit swings,
That fans to fire fame's coldly dying brand;
But eyes that sympathize with deeper things—
That look upon my soul, and understand.

Not to command the course of human tides,
Nor say unto their winds, Arise, Be Still;
But just to know the Me that in me bides,
And make myself a servant of my will.

History of Mechanical Engineering

THE School of Mechanical Engineering as a separate school was authorized by the trustees in 1884 and the following year the first student in M. E. was graduated. From that time on this department has been doing efficient work and for twenty years was the leading school in engineering in the West. Since then 1084 Bachelor degrees and 346 Advanced degrees have been conferred.

The construction of the Mechanical Engineering building was made possible in 1892 by the gift of Amos Heavilon and other friends of the University living in Tippecanoe County. The new engineering building with its shops and laboratories was dedicated January 21, 1894. Two days after, the main building, laboratories and part of the shop wings were completely destroyed by fire. Within two years, the present building was built on the same plans as the one burned. The locomotive which was in this fire when rebuilt was placed in the present locomotive laboratory. In June of this year fifteen degrees were given in Mechanical Engineering.

Prof. G. A. Young.

In the year 1911 the buildings of the department of Practical Mechanics were completed and the wings of the present Mechanical building were made available for new laboratories.

The department of Mechanical Engineering is noted for its fine laboratories in Steam, Gas, Automobile and Railway Work. For sixteen years this department has had charge of the Master Car Builders' equipment of air brake racks, brake shoe machine and drop testing machine. This department has been a pioneer in railway work and automobiles testing. The machine for determining the effect of flat spots on car wheels is the only machine of its kind in existence. The belt testing machine is acknowledged by experts to be the finest in the country. The completeness of gas laboratory equipment with its two kinds of gas producers, and internal combustion motors of many types, the Diell Dynamometer for special work, is a source of surprise and favorable comment from visiting engineers. Plans are now being prepared for new laboratories in heating and ventilating and refrigeration where special lines of research may be carried on in these important branches of engineering.

Students in Mechanical Engineering may specialize in the following courses: Steam Engineering, Gas Engineering, Railway Engineering, Heating and Ventilating, and Industrial Management. The graduates are well prepared by their broad course in Engineering and soon are found in responsible well-paying positions.

Prof. Ewing—"Now is there any questions?"

"Muggsy" is a quiet unassuming lad with never much to say, but when there is anything to be done you can depend on it that he is on the job. He is systematic by nature and efficient by cultivation. Due to his reserved disposition he is not as well known in the class as he should be, but those who know him best like him for his genuineness, his integrity, and his ready fund of droll humor. He is well fitted to uphold his end of any venture.

He is a quiet sort of a chap and not much of a fusset. However, his closest friends say that he has been known to hike the levee in the cold gray dawn. "Beadle" was one of the crack shots in the rifle team, holding the offices of captain in his Junior and president in his Senior year.

His perpetual good nature and gentlemanly qualities soon made him known and well liked among his classmates. Besides honoring himself as an excellent student, "Bennie" found plenty of time to devote to track athletics and swimming. He is not particularly fond of any one girl, but he does like to hear a pretty girl sing.

Putting the past and Colorado Springs behind him and forgetting his favorite sports of mountain climbing and photography but bringing with him the open heartedness and dislike of all things conventional, characteristic of the breezy westerner, Best has become a regular booster for Purdue and has worked hard and conscientiously for the welfare of the 1916 class. He secretly harbors within his brain the estimable ambition of some day becoming a railway magnate.

In the language of the streets "Doc" "put one over us" and received an A. B. degree from DePauw before beginning his course in Engineering. He is a good, steady, conscientious worker, with a disposition one can't help but like. You can often find "Doc" in bed by nine o'clock, but just the same it is the early bird that catches the worm and "Doc" is always up early in the morning. His habits are beyond reproach and as is often the case this and success are synonymous. He will combine his theories with practical work.

B. S. in M. E. Band (1) (2)

Bush is perhaps best known as a man of extra length who pushes a slide trombone in the front rank of the band. With an inexhaustible stock of droll humor he has listed himself in the hall of fame as a jolly good fellow. His extreme diligence in mastering things mechanical has deprived him of many pleasures rightfully earned. His chief fault is his persistent refusal to acknowledge his own ability and qualifications and gives others the credit whereas it rightfully should be his.

"Doo" had been out of high school for a couple of years when he entered Purdue. During this intermission from school he gained a fine lot of practical experience in industrial work and this line of work he intends to follow after graduation. George is full of pep and ambition and always goes into any job with a determination to win. There is little probability that many of the class will ever forget our royal court fool, "Keystone." Comedy is his specialty and all along the narrow road to knowledge he has smoothed the rough places for his fellow classmen with that bright happy smile and that incomparable sense of wit and humor. Along with his fine quality of congeniality, he possesses the power of quick and accurate thinking. Lessons were always the least of his cares.

Although known in Dayton, Ohio, as Homer and in LaFayette and vicinity as John, J. H. Emrick boasts of no further traces of a dual life. One of John's chief attractions is his sparkling enthusiasm over whatever his special new hobby happens to be. It must be confessed that most of his sparkling is confined to hobbies of the feminine gender, though he waxes eloquent at times at the mention of the magic letters "N. C. R." He has shown himself a power to make things go.

"Little Atlas," as he has been appropriately called, will always be looked upon by his fellow classmen as a man of steady character and high ideals. He has a strong trait of determination concealed in his make-up and he never fails in anything he undertakes. His "German" blood has endowed him with that aggressive military spirit so manly displayed "across the water."

"Charley" is one of those human beings possessed of such a bunch of Irish energy that his presence and ability are everywhere felt and recognized. He comes to us from Richmond, and since he is neither an Earlhamite nor a resident of East Haven, it follows that he must be a rail-roader. In fact "Shorty" says that he intends to make this his chosen field of work after graduation.

"Rough," a citizen of Missouri, is living evidence of that state's generosity in sparing him to us for five years. A painstaking student, he has more than casual acquaintance with the wee sma' hours. Even in his Senior year he refrained from entering the Fusser's Club. Though having no personal grudge against the Faculty, he is not entirely blind to the short comings of that august body. His ability to size up men has aided him to make friends.

"Dutch" hails from that quiet little hamlet on the banks of the Ohio. He is blessed with the rare ability to accomplish a semester's work in a short period of time. He has always been very liberal with his knowledge, and has many times aided his less fortunate brethren. His motto is: "Never let your college education interfere with a bridge game." "Germany" is very fond of arguing and has never been known to give up. However he is one of the best natured fellows in the Senior class.

To have "Baldy" among your list of friends is an asset well worth while. Few men about the University have been able to combine fun with work as well as Kline. His continued good humor is invariably manifested in a sincerity of purpose which often deceives his friends. Those who know him well, say that he returns borrowed articles and so far has never robbed a bank. He keeps appointments promptly and has never had any serious trouble with the faculty.

"Koehler" is a man whose clear reasoning and thoroughness have given us proof that he is well qualified to take care of himself. If he had concentrated his efforts at Purdue instead of dividing them with Crawfordsville, he would not have been forced to carry his books along on his week end visits. However, he is a stickler and his friends are proud of him. His hobbies are gas engines, revolvers, and a woman in particular.

Besides having those qualities which go to make a good student, he is a good mixer and possesses a personality which has won him many friends around the University.

He intends to spend at least one more year in this country working for the railroads before returning to his own land to exploit railroad construction upon a larger scale.

"Burt's" home is in Indianapolis, although he likes Chicago pretty well. He is one of the few who have been able to make Purdue in three years after graduation from high school. Although forced on this account to carry an unusually heavy schedule of school work, he is always in for a good time, especially when there is a swim involved. He has shown during his career at Purdue that he is out to win in anything he attempts and with this attitude he is bound to prosper.

Rife, more familiarly known by the secret code "T. R." arrived on the crest of the '16 flood. Although not an athlete he is a top notcher in the art of correct dress. Thus, along with his cleverness in repartee, and his adeptness in "topping the light fantastic" accounts for his phenomenal success with the ladies. "Stape's" chief occupation has been to study for tests, but even at that he always finishes strong at the end. By his class mates he will always be remembered for his too clean corridors. He will become an efficiency expert.

His ambition is to become an automobile efficiency expert. His interest at Purdue has been divided between study and fassing, and he has made good headway at both.

Our Standards

Molding from out the past we shape today,
O ut of our yesterdays we weave our hopes,

The Secret Garden

There's a bit of a garden unknown
Which no eyes have e'er seen but my own;
And the flowers that grow
In this garden I know
Are the sweetest that ever have blown.

Ah, no winds in their whispers confessed
To a spot which they knew, East or West,
Whose perfumes could compare
To the scents that are there
In the garden they never have guessed!

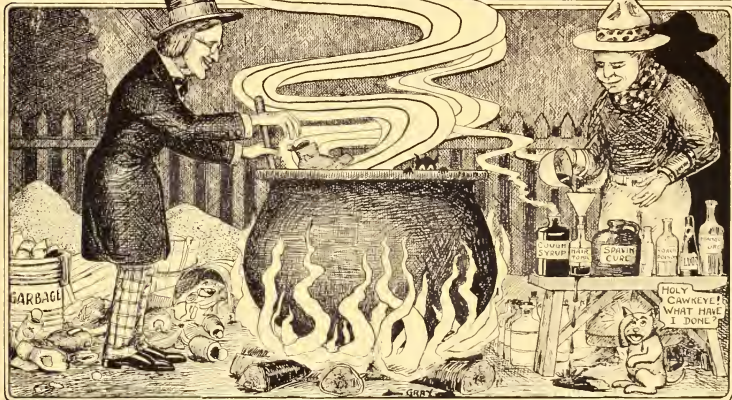

'Tis a place far away from the street,
With its rush and its hurry of feet,
Where the cares of the day
Are all left far away
And the peace of the heart is complete.

There is never a touch of decay—
Nor of things that are tinged in dismay,
And the sorrows and tears
And the pains and the fears
Are forbidden to enter away.

For this garden I know is apart
From the country or village or mart;
It is not in the clime
Or the kingdom of Time,
But it blooms in the shades of my heart.

And its flowers that timelessly grow
Are the days that I loved, long ago—
Which I've guarded and kept
From the years that have swept
O'er the past, in eternity's flow.

History of Pharmacy

PROF. C. B. JORDAN.

THE School of Pharmacy at present comprises two courses—a four year course, and a two year course. The four year plan of study is intended to fit the student for such positions as pharmaceutical chemists for manufacturing concerns, or for responsible berths with the State or Federal government. The two year course is planned to fit the student for the practice of Pharmacy. Recent pure food and drugs legislation has created a great number of positions for which this school admirably fits its graduates. Graduates of this school are holding important positions at present. The field of Pharmacy is great enough to offer great opportunities to those completing the course.

"Park" entered in the course in pharmacy with a good start from Butler College. His greatest weakness is his capacity for work, and he can be seen at the library during his spare hours industriously perusing the Iliad and the Odyssey. In 1912, Walter entered Purdue as a two-year pharmac. College life proved so attractive that he could not resist changing to the four year course. By hard, steady work, he has made a good record for himself in the class room. He has a pleasant disposition, which has gained many friends for him during his college career. We believe that this circle will grow constantly larger.

“Van” — “Speed God” — may be justly compared with Mercury in speed, accuracy, and efficiency in all departments. He is a man of few words, quiet disposition, and attends strictly to his own business in such a way that he is well liked by the students in general. He has always been on the level and has accomplished all of his undertakings without the least equivocation. For giving strictly judicial and unbiased opinions he has no superior.

Ph. C. Pharmaceutical Society,
Class Vice-President.

“Pat” by nature is favored with a sunny disposition which seems to permeate the atmosphere surrounding him on all occasions. Possessed of an untiring faculty for work and an enthusiasm that is contagious, he has no difficulty in pushing all his projects to a successful conclusion. It is seldom that one meets a more whole-hearted friend in whom we are satisfied to place the reputation of our Alma Mater.

“Tim.”

Ph. C. Pharmaceutical Society
(1) (2). P. A. A. (1) (2).

“Tim” is one of those men who always have a “Good Morning” for those whom they meet. His theory is, “Be pleasant every hour of the day until ten o’clock and the rest of the day will take care of itself,” without any further pleasant effort. If his future depends at all on his good nature and pleasant disposition it will be a howling success.

Somehow “Tubby” seems to get in on the ground floor when it comes to grades, for he certainly gets his share of A’s. His work at all times has been characterized by completeness and thoroughness which accounts in a measure for his excellent class standing. He is a jolly good fellow and accomodating beyond measure. Not a few owe their success to his aid. We are bound to feel the loss of his companionship when he leaves us.

"Denny" is a good mixer and
at the same time succeeds in pull-

With a well defined purpose in
view, Fisher has worked steadily
through his entire course. Keen

who can be relied upon in an emer-

are outstanding in his makeup are
tact and diplomacy; by reason of
which he can at times say things
that would ordinarily offend but in
so genteel a manner as to save the

he has cultivated these character-

Although not a varsity man, he is

His unchanging friendliness and his excellent conversational ability lead us to predict that as a druggist he will be a huge success. "Doc" is going to show the outside world just how much can be gleaned from the pharmacy course. Good luck to you, "Doc."

Hoff's good judgment is self-evident, not merely because we know him but because we know that he came to this school after one year at I. T. Numerous evenings spent across the river do not seem seriously to impair his scholastic standing, and his happy-go-lucky mood remains unchanged. Our only regret is that he has not been with us for four years, as he has at all times shown that unflinching good humor that makes a real companionable man.

"Coffee" is a striking and impressive young man of higher than average intellectual attainments and broad experience. He takes the world as it comes with complacency and is not worried over the fact that he has no bad habits. He has a spirit of optimism that will bring him customers when he has a pharmacy of his own. But all work and no play is not "Coffee's" idea of a proper education so it is with the same healthy spirit that he lends to his work that he enjoys occasional recreation.

Although diminutive in height his powers of argumentation and persistency aid him to victory on many a battle-field where a show of physical prowess would speedily annihilate him. It is this type of man that succeeds against all odds, and when "Shorty" starts filling prescriptions for the "sick and ailing" they are sure to be correct.

"Strick" deserted the Science course and took up Pharmacy after an interval of about two months, but not even this handicap could stop the "Little Dutchman" and his record still stands high. He loves the silence of the laboratory and can juggle chemical equations with the utmost skill. We believe he uses "smoke" to make them balance and if his choice of opportunities can equal his ability in choosing a collection of pipes—for "Strick" does love to smoke—great success awaits him.

"Red" is one of those "hail fellows well met" who easily win the friendship of all those with whom they come in contact. He is also a student of no mean ability although it is only justice to say that he has more often saved the day by his ready and quick answers than by reason of having studied diligently. It is also rumored that "Smoke" is a firm believer in woman's suffrage. His red "thatch" covers a brain that will work rapidly.

Perhaps the fact that "Wilkie" comes from the same town that was made famous as the birthplace of Dan Patch accounts for his speed if not his versatility. Combining university and social affairs in the right proportion, Wilkins emerges with the pleasant title of "a jolly good fellow." He has ever been very partial to the ladies and especially to the Purdue variety, finally deciding that "an engaged life" would be best.

Goodby, Days

Goodby, days!
 I never thought, in long ago,
 That when you were my yesterday—
 The sweetest ones I ever knew
 I'd say, "I loved them so!"

Goodby, days!
 The cord that binds you round my heart
 Is spun of blessed memories—
 Its strands of friendships tried and true
 Will never fray or part.

Goodby, days—
 Goodby—I loved you so!
 No flood of years can wash thy praise
 From out my heart or willing lips—
 Goodby, old campus days.

At Parting

The chimes ring out the last stroke of the hour:
 The books are closed—and one by one you pass
 Out through the loved portals. What a mass
 Of memories besiege you, on you shower
 The moments of a life forever done.
 Done? No! Years cannot hush these whispering halls—
 Each echoed voice, the hurrying footfalls,
 Will call to you beyond the setting sun.

And when you come, back from the hard campaign
 With trophies or with scars from hostile lands—
 Thy mother waits with love to ease the pain
 And praises for thy valor. From the stands
 Her younger sons shall rise to honor thee,
 And give thee place in their fraternity.

R. W. Nash— "Don't get hostile now."

PURDUE UNIVERSITY

History of Science

THE School of Science began in a small way, in the days when science was given a place in schemes of study by sufferance. In those early days every student in all of the schools took chemistry and biology and physics. It was in 1895 that the appropriations for current expenses were so largely increased as to make possible the beginnings of the changes which gave to the University its present form.

In that year four courses were developed in the School of Science: Premedical, Technical Chemistry, Sanitary Science and Bacteriology, and the Four-year Pharmacy Course.

The general course in Science was also necessarily maintained to meet the needs of those not wishing to specialize in any of the directions indicated.

Later the courses in chemistry developed so strongly that the course in Chemical Engineering was outlined. This at first was administered by the head of the department of chemistry, but was later erected into the separate school of Chemical Engineering.

In response to a persistent and increasing demand the department of Home Economics

was established, a department which has grown so rapidly in numbers that a suitable building for its work constitutes one of the most pressing needs of the University.

The department of Education was added to the School of Science to meet conditions arising from legislation concerning the qualifications of teachers. This department is not only meeting this demand in a most satisfactory manner, but also serves as a specially attractive and valuable elective line to those not specializing in education.

Special attention has also been given in recent years to strengthening the work in the departments which are fundamental to all of the courses. An examination of the lines of work offered and of the teaching force in each department will show what great developments have been made in Economics, English, History, Mathematics and Modern Languages. It is a question if more marked progress has not been made in these non-laboratory subjects than in the strictly laboratory subjects.

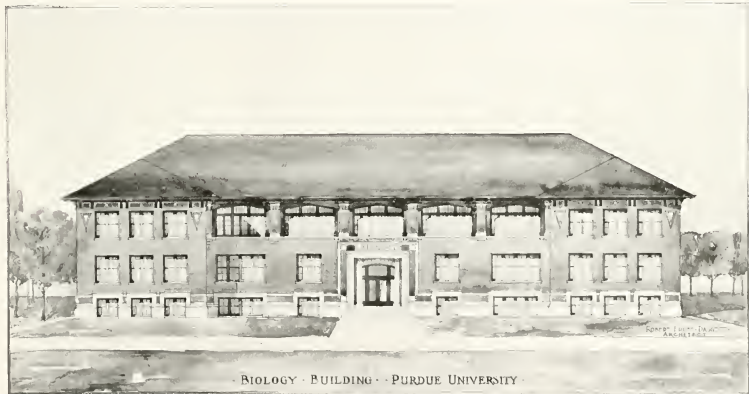

The latest department to be added is that of Forestry, which is attracting an increasing number of students each year.

In Biology there exist completely separate courses, each under a separate head and each furnishing a full four years' course of undergraduate work. Anatomy, Bacteriology, Botany, Physiology, Forestry and Zoology indicate fairly well the various lines of work possible.

"Beall" came to Purdue with a great responsibility resting upon her shoulders—namely, that of keeping up a family reputation. Regardless of the fact that she always carried as many hours of work as there were hours in the week and was a leader in all student activities that are open to coeds, Miriam has had time for lots of fun.

"Loy LeMoine" has spent four very successful years as a Science student. Girls do not bother Loy very much because he likes them all. However, there is no doubt in his mind but that he likes a Buckeye girl the best and we prophesy his early change to the ranks of the wedded ones. He is industrious, a quick thinker and has lots of initiative. He possesses a good business head and intends to put up a good fight in the business world.

"Bee" is a girl of stellar ability, of perseverance, and of originality. She has been unusually active in the affairs of the university and a more loyal supporter of the "Old Gold and Black" can not be found. If sound judgment and careful training count for any thing, she should become a successful teacher of domestic science, to which position she aspires.

Marguerite, in spite of her small size, is well known among us. Those who have had the pleasure of association with her know her true nature and feel that in her they have a real friend. "Bee" says that Boone County is the only county on the map and it all that come from Boone County are the best. However we are certainly satisfied with her verdict. Her genial personality and sunny disposition will carry her through life with many triumphs and with the happiness that come thereby.

Our first impression of Ruby was of a prim, reserved, little girl filled with the idea that there was "no place like home." For a while her chief cause of regret was that the week ends were so far apart. Needless to say, she has become unburied with the real wholesome Purdue spirit and has taken her place as an active and capable member of the '16 class.

"Cookie" has spent her four years among us in a cool calculating way which has brought much credit to herself. She has, seemingly without effort, attained that decorum and poise which so few of us have and which so many of us desire, that stamps her as a well educated person and fits her for all demands.

DAI GHERTY, DOROTHY MAUDE,
LaFayette, Ind.

B. S. Purdue Girls' Club (1)

Maude is another one of those energetic spirits who has gained the distinction of graduating in three years. A pleasing personality and a ready willingness to help others has won her many friends. Her type of broadness and unselfishness is a rare quality not often found in this everyday world of ours. From the cultivation of her intellectual abilities she has obtained great enjoyment and happiness.

Already Day has achieved considerable success in the insurance field, having risen from agent to president. He has been to Europe four times and once around the world. Besides this, he has educated two orphan sisters, both having gone through college. Day has a degree from Wabash College, where he made quite a record in athletics and student activities. He expects to obtain a master's degree from Harvard University. He has been asked to put in a department of commerce and business administration in a university of this state.

"Deek" wandered into our midst as little ones generally do but stayed to prove herself an essential to the class and has indeed shouldered great responsibilities. If she ever wasted any time, we never knew it; and needless to say, it is such as she that helps make the wheels go 'round. She has entered into many and various student activities with an enthusiasm that counts, as her position on the student council will attest.

DETURK, MARY EDITH.

Martinsville, Ind. "Turkie."

B. S. Purdue Girls' Club (1) (4). Y. W. C. A. (1) (2) (3) (4). Cabinet (2). P. A. A. (1) (4).

With one year at Indiana and one year as a home economics teacher to her credit, Edith became one of our number in 1914. A girl with high aspirations, love for hard work, and a keen sense of justice, make for her qualities we all hope some day to lay claim to. She is that type of girl which is so aptly described in every day terms as a typical good scout.

DEMOORE, MARGARET MOORE.

B. S. Purdue Girls' Club (2) (3) (4). Y. W. C. A. (1) (2) (3) (4). Girls' Glee Club (1).

Besides being a good student, Margaret is also an able musician. A good friend, a kind critic, and a ready hand to boost anything that is good are her principal qualities. She says her main occupation is work and from her work she derives most of her pleasure and enjoyment although it does become confining.

B. S. Forestry Club (4); Sec. (4); Jeffersonian (3) (4); Sec. (4); Class Insignia Board (4); Varsity Baseball (3) (4); Won "P" (3); Won Class Numeral (3).

"Chick" blew into our midst during our sophomore year after previous training at Valpo. Soon after he registered as a chemical engineer he decided that such a course, although fascinating one took too much from him of college education and had a longing to change. However, he plodded through two years of mysterious study and then decided he preferred science. Result, another fortune in our midst. We all know "Chick" as a baseball player of some renown as he won quite a reputation as a third sacker during his junior year.

"Gene" is the other one of the "Eaton" twins. His leaning towards nature caused him to choose forestry as his work. Field trips to Happy Hollow and north-west woods intermingled with frequent trips to the hills on the East Side have been a prominent part of his college life. He early decided he would have to do the fusing for both of the twins, and has done it well. "Edg" is always ready to tickle the ivories and will give you his best.

"Fitzie" is one of those diminutive persons who make up for lack of size by untiring application and an unlimited store of dynamic energy. She did not need domestic science to enable her to make fudge, the quality of which has gained for her an added distinction in the eyes of her classmates and friends (gentlemen included).

In 1913, Ethel decided that Purdue was far superior to I. U. and as a result Purdue gained a very self-sacrificing and conscientious student. Although one of the busiest co-eds on the campus, she always has time to lend a helping hand to one in need. Outside of study hours she is just a jolly fun-loving girl with plenty of friends and the ability to keep them. We trust that she will never have cause to lose her optimistic outlook on life.

Being naturally endowed with that important faculty known as common sense, it isn't the least bit of trouble for "Dutch" to get by. He no doubt at times entertains visions of becoming a Hoppe or possibly an Ira Kensen, but aside from this frivolous phase of his student life his more substantial characteristics brand "Dutch" as "distinctively individual." Common sense and perseverance are distinctive features of his character.

HEBL, ALICE FRANCES.

LaFayette, Ind., K. A. O. "Al."

B. S. Purdue Girls' Club (1) (2) (3) (4).

Alice was recruited from the '15 class and since joining our ranks has been a loyal supporter. She is one of the true blue type of friends. Her greatest asset is a perfectly balanced sense of humor for she enjoys a joke with the rest of us even though she may be the target. An exceptional ability to adapt herself to circumstances has helped her immensely every day.

"Elsie" has been a staunch member of the '16 class and has worked hard for its betterment. A charming simplicity, an eager search for opportunities to help and cheer, a scholarly mind, and an unobtrusive but well founded confidence in her own varied abilities makes Elsie a friend who is sought for and loved. We meet such winning clean cut women but seldom and are always the better for that meeting.

His morose moments, though frequent, are very thin and it is not long before his face elongates to the elastic limit, then broadens into a smile and then bursts into his characteristic grin. His favorite book is the Tippecanoe County Telephone Directory, a special copy of which he takes great pride in exhibiting.

Huntington, Ind. "Ann."
"Minerva."

B. S. Purdue Girls' Club (1)
(2) (3) (4), Girls' Glee Club
(2) (3).

Anna is one of the charter
members of the "Red Annex"
about whom the lure of technical
home economics cast its spell, but,
when she came to know the sub-
ject better she decided to shift to
practical economics. She has easi-
ly suffered the hardships of Ger-
man, her native tongue, and will
make a strong bid for membership
in the United German Clubs of
America. She has, at all times,
been a good companion.

KLEIN, EMMA FORD,
Huntington, Ind. "E. F." "Em-
mer." "Grandma." "Kliney."

B. S. Purdue Girls' Club (1)
(2) (3) (4), Y. W. C. A. (1)
(2) (3) (4).

"Emma Ford," (although not
possessing one), can appreciate a
good joke better than any one else
we know. While she enjoys this
light surface play, her many
friends know there is at times a
far more serious aspect to her char-
acter. Her slogan is, "Emma
(de)Klines to look on the dark
side of life." Such a happy out-
look on life would be a most wel-
come adjunct to a happy home.

LEITER, MAUDE,
LaFayette, Ind.
B. S.

Another teacher student has
joined the ranks of the Senior
Science class this year. By work-
ing early and late, Maude has com-
pleted her line of study little by
little, until the goal was reached.
Although she has been with this
class but one year we are glad
she chose to graduate with us.
Besides her interest in University
work and her duties as teacher in
LaFayette schools, she has always
taken an active interest in encour-
aging young people to attend Pur-
due.

PURDUE UNIVERSITY

PURDUE

DEBRIS

LOU EDAN, ELMINA CHARLOTTE
Sutherland, Iowa. "Tyke."

B. S. Y. W. C. A. (4). Purdue Girls' Club (3) (4). Girls' Glee Club (3) (4). Accompanist (4). Philaethean (3) (4).

Arriving at Purdue from Iowa State in 1914, a typical western girl, "Tyke" became one of the few Purdue girls who dared brave the trials of the mathematics department. Majoring in that subject, she has come through so successfully that we find her, during her Senior year, assisting that department in clearing up the geometrical delusions of the Freshmen. Elmina has marked musical ability which has given much pleasure to her friends.

MAPLE, EULA BLISS
Terhune, Ind. O. N. "Bliss"

B. S. Purdue Girls' Club (1) (2) (4). Y. W. C. A. (1) (2) (4); Cabinet (1); Sec. (2); Girls' Glee Club (1). Vesper Choir (1). Philaethean (1) (2) (4); Treas. (2); Censor (2); Pres. (4).

Easily approached and of splendid disposition, "Bliss" has made many friends. She is earnest, conscientious, untiring in her efforts, and has thus gained the best and finest things from her college course. Not only in the class room but in college activities outside she has shown the qualities of leadership. Uncomplaining and undaunted, she has overcome many obstacles.

MYRTLE, HUGH MCCUNE,
Lelomon, Ind. F. T. A. "Matt"
"Huge." "H." "Ox."

B. S. Forestry Club (3) (4). Y. M. C. A. (4). Class Vice Pres. (2). P. A. A. (1) (2) (4) (4).

"Matt" is something of a tourist and takes side trips throughout Indiana including the little place known as "Frankfort." Lately he has taken to loud shirts and noisy ties, but he may get over the habit. Once he was decidedly interested in sorority affairs, but that's another story. As a matter of fact "Matt's" heart is in the right place and his friends are glad to have him around at all times.

MYRTLE, MARY JO
West LaFayette, Ind.

B. S. P. A. A. (1) (2) (4). Glee Club (2) (3) (4). Purdue Girls' Club (1) (2) (3) (4).

All co-eds, it seems, do not indulge in home economies for Mary passed that subject up for the intricacies of chemical formulae and symbols. Due to a misfortune, and not to the treacherous of chemistry, Mary failed to graduate last year. Misfortune! For her perhaps, but not for us, as we know that she will reflect credit to the name of Purdue when she leaves the University, regardless of the work she decides to follow in the future.

1916

1916, OZARK,

Newtown, Ind. "Rozark."
"Little Palin."

B. S. Purdue Girls' Club (1)
(2) (3) (4). Y. W. C. A. (1)
(2) (3) (4).

"Little Palin" entered our midst as the unsophisticated maiden in search of knowledge. Little did any one imagine that she would aspire to the title of countess and spend her spare moments in the presence of royalty. Even though that honor was bestowed upon her, she showed her real work as a student and her fidelity as a friend by allowing nothing to interrupt her study hours and her companionship with the girls. Her friends will not soon forget her.

PALMER, PHILENA FRANCES,

LaFayette, Ind. K. A. O. "Phil."
"Phi."

B. S. Purdue Girls' Club (1)
(2) (3) (4).

There is no girl in the class loved and respected more than little Philena, and although her stately and dignified manner may oft deceive strangers, it is proved that you can find a real live girl beneath the dignity. She is the frank, the genuine kind who has cheered many a hopeless soul during her four years at Purdue. Through her untiring efforts she has been able to boast along many class activities. It is safe to say she may number every girl in the school among her loyal friends.

PARKS, VERA ECHO,

Gas City, Ind. O. X. "Parkie."
"Echo."

B. S. Purdue Girls' Club (4).
Y. W. C. A. (1) (2) (4); Cabinet (4). Philalethean (4).

Whole-souled and ever ready to lend a helping hand, Echo has endeavored to make life pleasant for those about her. Her quiet, reserved and unassuming manner has won for her a place in the affections of all those who know her. Although enrrying long hours of heavy school work, she has found time for numerous school activities, showing special enthusiasm in the work of the Y. W. C. A. Gas City looks with pride at this daughter.

RICHARDSON, INEZ MAY,

Clayton, Ind. M. E. A.; O. N.
"Billy." "Skippy."

B. S. Purdue Girls' Club (1)
(2) (4). Y. W. C. A. (1) (2) (4). Girls' Glee Club (1)
(2) (4). Purdue Chorus (1)
(2) (4). Vesper Choir (1) (2)
(4). Class Secretary (4). Philalethean (2) (4); Critic (2).

Even if Inez is the only one of her class who has had nothing but A's, she has always had time for the other things in Purdue that make college life really worth while and is ready for a "lark" at any time. All the girls recognize in her a strong personality and an ability to make whatever she undertakes a success.

1916 Debris.

Everyone in Purdue knows "G. A." for there are few men who have done more for their class and university. He has many friends both among the students and faculty.

SAMPLE, JOHN LAVIN,

Madison, Ind. "Samp."
"Ag."

B. S. Forestry Club (3) (4);
Vice-Pres. (3); Pres. (4); *Ex-
ponent* (3); Class Insignia
Board (3); Class Executive
Board (4); P. A. A. (1) (2)
(3) (4).

"Crackers," a great medicine
booster, began his career at Pur-
due as an Ag, but finding this too
tame he changed to the forestry
course in his second year. As a
student of forestry he has given
his best and gained a distinct place
in the regard of a large number
of his classmates. His "let-it-
rain" attitude in the face of many
storms stamps him as a "comer."

SEWELL, MARGARET ETHEL,

Oxford, Ind. "Betty," "Bet-
tina."

B. S. Purdue Girls' Club (1)
(2) (3) (4); Y. W. C. A. (1)
(2) (3) (4).

"Betty" entered school with the
1914 class. Later she spent a year
in the West, but her Purdue ideal
was not completely lost in the won-
drous beauty of Colorado. She
could not escape the inevitable and
came back to old Purdue. Then
"Betty" had a streak of misfor-
tune; she was out of school for
another whole year. She came
back to Purdue with a maximum
amount of potential Purdue spirit
and what is better still, to graduate
with the 1916 class.

SHEPHERD, ELLIOTT,

Lafayette, Ind.

B. S.

We are pleased to have in our
class such a true friend and loyal
companion as Mr. Shepherd.
Entering the university three years
ago she at once became a prom-
inent influence in her college and
classmates, and this influence has
made itself felt throughout her
career. She has not been hesitating
making friends and has been in
Purdue longer than the first.
She has not allowed school work
to interfere with her home
duties and she leaves us with our
sincerest wishes for future success
and happiness.

SIGWORTH, DANIEL ANTHONY

West LaFayette, Ind. $\Phi\Delta\Theta$.
 "Sig." "Dan."

B. S. Vasovienne (2) (3) (4),
 Harlequin Club (2) (3) (4);
 Musical Director (2) (3) (4),
 Military Band, 1st Musician (3)
 (4); Ass't Director (4), Or-
 chestra (1) (2) (3) (4); Con-
 cert Master (4), Forestry Club
 (4).

"Dan's" original idea of be-
 coming a great chemical engineer
 was primarily frustrated by his in-
 ability to break away from music
 and things musical. During his
 four years stay here he has estab-
 lished an enviable musical reputa-
 tion as leader of the band and
 Harlequin Club orchestra.

SMITH, NINA BLANCHE

Lipton, Ind. O. X. "Nina B."

B. S. Purdue Girl's Club (2)
 (3), Y. W. C. A. (1) (2).

Three years ago every one was
 interested in the most original and
 witty little Freshman in school,
 Jolly, clever and always busy,
 "Nina B." has continued to re-
 tain the admiration of all. Late
 in her Sophomore year she decided
 that time was a valuable thing and
 so she cast her lot with the '16
 class. In spite of her short stay
 here she has proved herself an ex-
 cellent student and has also had
 time to be a true friend to many
 in administering a helping hand in
 moments of trouble and worry.

STERN, BERNICE

Madison, Ind. M. S. A. "Bee."
 "Stein."

B. S. Purdue Girls' Club (1)
 (2) (3) (4), Girls' Glee Club
 (1) (3), Philaethan (1) (2)
 (3) (4); Pres. (3).

From the very first "Bee" real-
 ized that she was a student at a
 real university and she started in
 to enjoy the novelty. A good stu-
 dent, pleasant, obliging, and ever
 willing to put her shoulder to the
 wheel and help when necessary, has
 made her well liked by all. Such
 girls as "Bee" help to make school
 life enjoyable and rouse one to
 remember with pleasure college as-
 sociations.

STRAW, KATHRIN ELIZABETH

West LaFayette, Ind.

B. S. Purdue Girls' Club (3)
 (4), Y. W. C. A. (4), Girls'
 Glee Club (3) (4).

Kathrin, although one of the
 smallest members of our class, has
 exhibited beyond a doubt that
 some of the best things come in
 small packages. With a liking
 toward engineering and an educa-
 tion along domestic science lines
 it is only a matter of conjecture
 what her ultimate goal will be,
 but of this we are assured: the fu-
 ture holds for her a worthy field
 for her talents and she means to
 make the most of any opportunity
 that presents itself.

1916

TOWSLEY, IDABELLE.

West LaFayette, Ind. K A O.

B. S. Purdue Girls' Club (1)
(2) (3) (4). P. A. A. (4).
Chairman May Day Committee
(4).

It is much to our own sorrow that Idabelle spent two years at Jackson, Illinois, before coming to Purdue, for ever since her arrival she has shown those sterling qualities that endure her to us. Only to say that she has engaged in a new enterprise means that she will lend her utmost efforts to see it through. She is a shining example of the truth that a strong purpose is a good start in any race, however long.

WAUCHOF, BESSIE EILEEN.

Brookston, Ind. O N. "Bess."
"Bettie."

B. S. Purdue Girls' Club (1)
(2) (4). Girls' Glee Club (1)
(2) (4).

Our dignified Senior, as she is most often called, came to us three years ago with a good basis for a college course, having had one year at I. U. She is very reserved, deliberate, and self possessed in all that she does, and commands the respect of all with whom she comes in contact. With her quiet sincere way she has won many friends, who all agree that "Bess" is one of the most unselfish persons they have ever known.

WAUCHOF, ELSIE.

West LaFayette, Ind. O N. "Elsie."
"Shorty."

B. S. Purdue Girls' Club (1)
(2) (3) (4). P. A. A. (4).

"Elsie" has the reputation for being one of the best natured Purdue girls, which in itself is a good reputation where competition is so keen. We have never seen her perturbed nor the least bit in a hurry, unless it be to make an eight o'clock. Her winning smile and pleasant ways make everyone her friend. She also is noted for having a fitting remark ready for every occasion, usually both humorous and instructive.

WISSON, ROBERT EUGENE.

Cynthiana, Ind. A T. (1909)

B. S. Forestry Club (1) (1),
Treasurer (3). Insignia Board
(4). P. A. A. (1) (2) (3) (4).

"Rutsy," the pride of Cynthiana, came to Purdue with his heart set on a brilliant engineering course, but after spending a summer in the west and finding a profession overstocked, he reported and turned to forestry as a career, wherein he could shine as brightly as he had ever before. He has the incentive that has made many Purdue men fight valiantly through four hard years and has been a winning fight also has constant sunny disposition could not be accounted for.

WINDLE, NINA CHARLINE,

West LaPayette, Ind. M Σ A; O X.

B. S. Purdue Girls' Club (1) (2) (3) (4); Pres. (1) Y. W. C. A. (1) (2) (3) (4); Sec.-Treas. (3), Girls' Glee Club (2) (3) (4), Vesper Choir (2) (3) (4), Purdue Chorus (2) (3) (4), May Day Committee (4), Philalethan (2) (3) (4); Critic (3); Sec. (1), P. A. A. (4).

Although Nina entered with the '15 class, we are glad that she decided to spend at least one year with us. Not one who *will* but one who *does*, is a characteristic of her. She possesses a striking personality and with it the rare combination of equality and good judgment.

UNSUNG HEROES

(Note: A Mex. Athlete is a W. J. B. Athlete.)

O! gentle reader, cast your eye
Along the halls of fame,
And glimpse the worthies gathered there,
And read each honored name.

Peruse the deeds of Oliphant,
Of Brickley and Ted Coy;
Give unto Thorpe a passing glance—
Mount Pleasant, Little Boy;

And Eckersall, and Heston too,
And Arlie Mucks, and Rose;
Then scan the list with closer gleam
For our unsung heroes.

O! gentle reader, cast thy lamps
Upon those mighty feats,
And see if ever mention's made
Of Mexican athletes.

When training starts they sally forth
As regulars had ought—
And, for the season on the bench,
They pick the softest spot.

A hope eternal lives in them—
A hope of brassy beam;
Through all the season hang they on
Like bulldogs in a dream.

The last game's played and over with—
Another sport's begun;
The call goes forth, the Mex's sign,
For they are never done.

For every sport's their specialty,
And for each team they aim;
They never make the tailmost squad,
But still hang on—still game.

And so, kind reader, lend a place
Unto their mighty throng;
Fame gives no laurels to a race
So valiant and so strong.

PURDUE 1916 DEBRIS

PURDUE UNIVERSITY

Military Department of Purdue

JUSTIN MORRILL in his bill, which became an act of Congress in 1862, stipulated that land grant institutions should give instruction in Military Science and Tactics as well as Agriculture and the Mechanical Arts. Purdue University was founded and aided under the provisions of this same Morrill act. Accordingly, in 1888, the Military Department was organized with First Lieutenant Abner Pickering, 2nd U. S. Infantry, now colonel of the 11th Infantry, as commandant.

Lieut. Pickering in his first official report to the War Department stated that out of a student body of 260 men, 92 were drilling two hours per week. Of these 16 were doing field artillery work and 76 were organized as a company of infantry. Aptitude was "Good"; interest, "Great"; and discipline, "Moderately good."

First Lieut. D. D. Johnson, 5th Artillery, relieved Lieut. Pickering in October, 1891. He stayed until Jan. 18, 1894. It was during his term of duty that the corps of Cadets was first organized as a Battalion of infantry. By the time First Lieut. S. M. Miller, 5th Infantry, arrived, March 16, 1894, the corps had grown to a strength of 257. Lieut. Miller

was very successful in his work. In 1895, he organized a band of 12 pieces. A cyclist infantry section was also organized. In addition there was a Signal detachment, one platoon of field artillery, and four companies of infantry.

First Lieut. M. R. Peterson, 6th Infantry, came in March, 1898, but was relieved on account of the war with Spain in May, 1898. During the Spanish-American War military instruction was suspended, and was not resumed until Captain Ira M. Reeves, U. S. Army, retired, reorganized the corps in March, 1902. At that time there were two battalions of infantry, a band of 20 pieces, a field battery of 40 cadets, detachments of engineer corps, signal corps and hospital corps; total 419. At this time the armory was reported "entirely inadequate," and has been so reported each year up to the present.

Captain Frank H. Allright, 25th Infantry, arrived Jan. 24, 1903. He organized the corps as a regiment of infantry plus a field battery. He was relieved by Captain W. J. Lutz, 28th Infantry, Sept. 6, 1905.

It was due to the untiring efforts of Captain Lutz that military drill at Purdue was first given proper official standing. He organized the system of grades and administration; and put the subject on the same plane as any other that was required for graduation. At that time a special military diploma was first given; and cadet officers were given a small cash scholarship. The band was united more closely to the corps of cadets than it had been.

Captain Benjamin H. Watkins, 2nd Infantry, stayed one year after relieving Captain Lutz. He in turn was relieved by Captain Harrison J. Price, 2nd Infantry, who carried on the work from Sept., 1910 to Oct. 1, 1913. Captain Price was relieved by First Lieut. Robert G. Kirkwood, 3rd Field Artillery, who is the present commandant.

During the year 1915-1916 the corps was organized as a regiment of infantry, consisting of three battalions of four companies each. The total strength in November, 1915, was 1043.

On February 24, 1916, the old frame armory, which was among the first university buildings built, was destroyed by fire. In earlier days it had served as a place for social gatherings, a gymnasium, and an armory; but of late years it was inadequate and unsuited for any of these purposes.

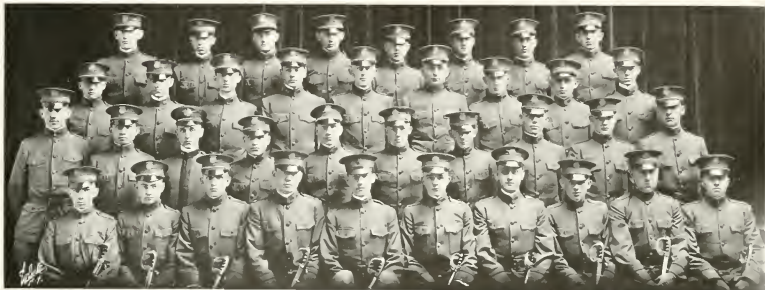

After the destruction of the armory voluntary work in the form of an officers' and non-commissioned officers' school was organized. Over 200 cadets took up this work and will form an excellent body from which to draw for instructors in the new corps of cadets.

Due to the European War and our Mexican problem, as well as changed conditions in the corps, military training at Purdue has recently made decided progress. The student body, especially those participating, are realizing the possibilities of the work and are going at it in a more earnest and business-like manner. This is evidenced by the fact that the Sophomore battalion, for years the least proficient, is now the best battalion in the corps as it should be. And although the standard of discipline is constantly being raised, not a single cadet had to be subjected to serious disciplinary action this year.

It is with much hope and encouragement that we look forward to a new corps, organized with well instructed cadet officers and non-commissioned officers, and housed in an adequate armory.

Harlequin Club Managing Board

In presenting "Around the Campus" this season, the members of the Harlequin Club more than did themselves proud. The show, which was outlined for the Purdue Thespians by George Ade, was undoubtedly one of the best productions ever seen in LaFayette and will long be remembered by those who were fortunate enough to attend.

No definite announcements have been made for next season, but the newly elected board will no doubt equal, if not surpass, the high standards set by its predecessors.

Purdue Harlequin Club

A Revue

Presenting "Around the Campus," the Purdue Harlequin Club is producing the tenth college musical show since the beginning of the organization. Although there have been many hardships and unforeseen difficulties come in its path, the club has so far survived each and is at present one of the best equipped, financially and otherwise, of any organization in school. This can be accounted for by the strictly business-like methods which have been employed in the presentation of the past nine comedies.

The Purdue Dramatic Club was founded in 1907, the name being changed the next year to the Purdue Harlequin Club. New features are constantly being introduced by the management, attempting at all times to raise the already high standard of the organization. In line with this method of procedure the Co-eds of the University were this year, for the first time, allowed to have parts in the production; hand in hand with this change has come the decision to turn to the more up-to-date and popular form of amusement—the musical revue.

In the choosing of persons for the various parts it is the policy of the club to give every person trying for the play, an equal opportunity to show his or her ability. No undergraduate connected with the club receives any financial remuneration whatsoever but the members of the Managing Board give their time and energy for what honor and experience there is in the position. Besides this, each participant in the play must maintain a creditable scholastic standing in his or her school work.

During the existence of the club up to the present date, the Harlequin Club has staged a number of famous productions, chief among which was George Ade's "Fair Co-ed," in 1908. This play was produced for the first time under the auspices of the Harlequin Club, and made such a hit that it was produced for several seasons on the professional stage with great success. "The County Chairman," in 1911, by the same author, and "The Elastic Limit," in 1912, by Sidney Grundy, further enhanced the reputation and popularity of the Harlequin Club productions, so that each year one or more shows are given in adjoining Indiana cities, such as Indianapolis and Ft. Wayne.

English Department Players

THE desire to bring the student body into intimate contact with the new movement in the theatre prompted the English department to attempt what were virtually the first productions of legitimate drama ever staged at Purdue. As a result of this desire a plan was developed similar to that of branches of the Drama League of America, and the Little Theatres of Chicago, Philadelphia, and Indianapolis, to present one act plays, plays by modern and native authors, and plays depending on intellectual and artistic rather than theatrical appeal. The play was to be the thing, and scenery and costumes were to be honest, but simple. With this plan in mind, a group of students, under the direction of Bernard Sobel, presented readings, in costume, of the following plays: "A Gentle Jury," by Arlo Bates; "The Workhouse Ward," by Lady Gregory; "The Fifth Commandment," by Stanley Houghton; and "A Marriage Has Been Arranged," by Alfred Sutro. The plays were successful and, through

their inspiration the literary societies gave a reading in costume of "Thompson," by St. John Hankin, a play that has never been given a professional performance in America. Since then the activities of the players have been manifold. Organized under the title of the English Department Players, they have given the following plays, reading in costume: "The Twelve Pound Look," "On His Devoted Head," "By Ourselves," Fulda; "The Lost Silk Hat," Dunsany; "A Doctor in Spite of Himself," Moliere; "The Dear Departed," Stanley Houghton; "Marse Covington," George Ade. Many plays were repeated. "A Gentle Jury" was performed before the LaFayette Suffrage League, and "Thompson" was given at the West LaFayette High School. "The Dear Departed" was given at the Jefferson High School, and one entire program was repeated for the Short Course students. Between public performances the players meet to study plays and authors.

Junior Class History

EVERY September, for forty-five years, there have entered Purdue men and women in the prime of youth, too young, perhaps, fully to realize the responsibilities to be thrust upon them in later years; yet full of the enthusiasm and stamina, known only to this type, which make the mountains of life seem like ant-hills, the deep abysses of misfortune as mere crevices. Judging from the three years of association, no class has yet entered so well qualified to uphold and sustain these high ideals as has the Class of 1917.

The simple statement of facts, however tiresome and tedious it may seem, will further justify the high standard already assumed. The Class of 1917 has the distinction of winning the last Tank Scrap, that time-honored event, characteristic only of Purdue. Further, the physical prowess of the 1917 men was established by carrying off the class championships in football, basketball, baseball and track during the Freshman year. But let us not confine ourselves to physical strength and superiority alone. From the start everyone settled down to work zealously with the Purdue spirit founded tenaciously in their lives, and as a result much activity was displayed in all departments of the university.

To review our Sophomore year would be only to emphasize and accentuate the accomplishments of the year previous. A tree well started never ceases to grow nor to bear a liberal portion of fruit unless stunted by some internal cause. Probably it is best to bring out at this time the perfect harmony and unity which has always existed

between all members of the class. At the beginning of our Sophomore year a grave crisis threatened us, financially, but through the faultless working order of the machinery of the class, this was averted, and today the class ranks highest of all in this particular matter.

Neither an upperclassman nor a Freshman, the Sophomore occupies a unique position in university life, so that in this year one is inclined to form closer friendships with his classmates and acquaint himself more familiarly with his surroundings in the university community. The newness having worn off, the Sophomore digs deeper into his immediate surroundings, and in so doing uncovers an immense field to work upon.

To one not accustomed to sudden changes in power and position, the rise from a Sophomore to a Junior has its accompanying sensations and thrills, bewildering, yet stimulating and satisfying. Our appearance in the parade on Stuart Field the day of the first football game, with the new Junior hat, white with a dark blue band, caused no little admiration and comment from the crowd assembled. The Junior Prom Committee was elected early in the fall and proceeded at once to formulate plans for the most brilliant social event of the year. This year's Junior Prom promises to eclipse those of former years in completeness of preparation as well as in radiance and splendor of even the most minute detail. With a record of this kind to its credit, the Class of 1917 cannot be prevented from enjoying an enviable position in the annals of Purdue history.

Sophomore Class History

THE time rapidly draws near when we can look upon ourselves as upperclassmen, and it is not only with a feeling of pleasure and anticipation, but also with a feeling of gratification; for we feel that we have laid our foundation well and now our greatest work is to build.

Athletic records show that we have gallantly carried forward the record that we began so well as Freshmen. We have been well represented in all forms of athletics and in a manner that is a credit to the wearers of the purple and grey.

Nor have our activities stopped with athletics. We early felt that student activities were as much a part of our

university life and education as our classroom and we find ourselves represented in the various Literary and Technical Societies, and on the Exponent Staff and other student publications.

We even found that our Freshman constitution was not sufficient for our growing class and it was revised to meet the demands of our organization. Our motto has been, "Make the most of each opportunity as it presents itself;" and with this as our watchword in the coming two years, we hope to make for ourselves a place that will mean something to our class and to our Alma Mater.

Freshman Class History

WE find the old saying again true that history repeats itself with the entrance in the fall of every year of (in its own words) "the most remarkable" Freshman class. The class of 1919 is no exception to this rule as far as increasing numbers are concerned, but we feel that in quality as well as in quantity we equal if not excel all predecessors. We have shown our ability in immediately organizing our class under a constitution formulated with such care that it will not need revision in coming years. By flaunting our green caps in season as well as out of season and by ready adherence to all the unwritten rules of the university we have shown our class spirit and loyalty to traditions.

In the field of athletics we have won a place of which we may well be proud. In both football and basketball our varsity teams not only defeated all opponents but gave promise of sterling material for future varsity teams.

In the establishing of new customs we have taken the initiative in the creation of two new customs which we hope will become annual affairs. The first variation is the celebrating of a Freshman green cap burning day on Stuart Field by a huge bonfire, where all the green headpieces will be committed to the flames, which sacred rite will be preceded by other interesting ceremonies and stunts.

To the girls of our class belongs the honor of establishing another future Purdue custom, namely, that of selecting and wearing a special green hat in place of the heretofore regulation green cap and toque worn by both boys and girls alike.

With the establishing of these two new customs and our increasing interest in our work, our class, and Purdue as a whole, we end the first chapter of the history of the class of nineteen hundred nineteen.

History of Bell

FOUR years after the erection of the old heating plant in 1873, now marked by a concrete slab directly opposite the Pharmacy building, the Purdue Bell first took its place as an important factor in University life. Its early morning peals awoke the slumbering students, the hourly reverberations throughout the day sent them to classes, and its final clang at night was the warning for all to extinguish the lights.

When, in 1903, the State Legislature appropriated money for a central heating plant, it proved to be a turning point in the history of the bell.

With the dismantling of the old heating plant, the building was removed and the old bell ceased to send forth its daily calls, but instead became for a while an inanimate object of interest in the locomotive museum.

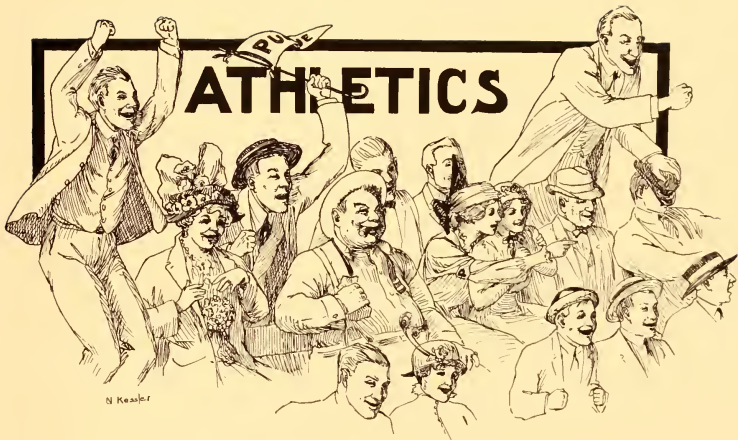

In 1905, a committee was placed in charge of the designing, raising of funds, and the construction of the carriage upon which the bell is at present mounted. Before their labors were finished the bell had already become symbolic of victory and many were the occasions in those days for its tones to breathe forth in celebration of success to our colors in athletic contests.

It is not without a great deal of pride that we see or soon hope to see this priceless treasure of bygone days, this relic so rich in memories, so suggestive of all the fine traditions of the University, housed in a permanent and safe abiding place.

MEMORIAL GYMNASIUM

Home for vacation.

Memorial Gymnasium

THE saddest event in the history of Purdue occurred on October 31, 1903, when sixteen men, nearly all of them on the football squad, lost their lives in a railroad wreck. The catastrophe took place near Indianapolis, the train on which the men were traveling being a special carrying rooters and team to the annual football game with Indiana. The men who were killed occupied the coach in which the players were riding.

It followed naturally that Purdue men and friends of Purdue desired to pay tribute to the men in the form of a lasting memorial to them. Athletics at Purdue had long been handicapped by lack of a suitable gymnasium, and Mr. W. J. Jones, Jr., '91, conceived the idea of erecting one and dedicating it to the sixteen football heroes. The LaFayette Journal approved the idea and soon it was taken up almost unanimously. However, since funds were being secured by means of private and class subscriptions, it took some time to raise the money necessary to erect a suitable building.

It was planned at first to erect a building which would combine the present type of Student Union structure and a model gymnasium but it soon became clear, owing to a lack of funds, that it would be years before such a structure could be built. The building committee finally reached the conclusion that a gymnasium in itself would be entirely adequate. Accordingly the plans for the present building were finished and the gymnasium was erected in 1908 and 1909.

The gymnasium as it stands today is a handsome structure, the exterior being of pressed brick trimmed with Bedford limestone and the roof of red tile. The equipment

is entirely modern and complete, and the design is such as to make the most economical use of the interior space. More than 2000 people can be seated at the basketball games.

During the past year several minor changes have been made in the gym. Two large fire exits, one in the north wall and the other in the south end of the gym, were placed there last year to safeguard the lives of those who attended the contests in the gym. During the present year part of the front annex has been converted into an office for Prof. Cutts, head of the department of physical education. Under his direction the seating capacity of the gymnasium has been increased over three hundred seats.

The present overuse of the gymnasium makes all the more evident the need of a large armory in which track work, basketball and indoor baseball practice could be held. At present the wrestling team is crowded into the basement because of lack of space. A schedule which allots certain hours of the week to varsity, class teams, Y. M. C. A. basketball league, wrestling, gym classes, girls' gym classes, faculty, varsity baseball, varsity track, etc., has been arranged in order that the gymnasium may be of the greatest benefit to the largest number of students and faculty members.

The burning of the old Purdue armory makes the road clear for the building of a modern armory such as is possessed by several other conference schools. With a modern armory all indoor baseball and track work could be transferred as well as basketball games, leaving the gym open for regular gym work.

"P" MEN

1915-1916 TEAM MANAGERS

Purdue Varsity

In order to further the interest in university athletics and to promote good fellowship among the wearers of the "P" a meeting was held in May, 1914, by the varsity athletes, who, at that time, organized themselves into the "Purdue Varsity." Many subjects which are of prime importance to the varsity athletes are discussed at the monthly meetings of the club. To interest the alumni varsity men in Purdue athletics, an annual banquet is held.

The club is composed of two classes of members, viz: regular members and honorary members. Men who have won their varsity insignia or who under the present system would be eligible for insignia, comprise the list of regular members. The honorary members are those who have in some way furthered the cause of Purdue athletics by some exceptional services, given in the cause of Purdue athletics.

Prof. Oliver F. Cutts came to Purdue this year as head of the newly established Department of Physical Education. Knowing that the new office would be a very difficult and responsible one to fill, careful search was made and many applicants considered, but the final decision handed down was strongly in favor of the man selected. Prof. Cutts comes to Purdue with an enviable record both as an athlete and as a sound business man. A graduate of Bates in 1896 and of Harvard Law School in 1903, he received the training which ably fits him for his present work. He has been actively engaged in or connected with work along athletic lines since graduation and is a firm believer in athletics for one and all. As an athlete he enjoys the distinction of being the greatest tackle Harvard has ever produced and easily won a berth on the All-American team before he graduated. With such a man behind athletics at Purdue there is little reason to think that Purdue should not be foremost of all Western schools in this line in a few years.

Department of Physical Education

A NEW departure in the management of athletics at Purdue was undertaken this year and so far has proved itself practical and advisable. Athletics, like mathematics or kindred sciences, has been placed in the hands of one man, who directs and is responsible for the work of the department. Physical training is now placed on a more or less compulsory basis and more attention is being paid to the physical welfare of the university as a whole, rather than the development of a comparatively small percentage of the school. Credit must be obtained for a certain amount of physical exercise taken during the school year by all students in the university, since this is required for graduation. More emphasis has been placed on the development of the student body physically as well as mentally than ever before at Purdue. A well organized corps of coaches and trainers makes possible the carrying out of the idea of the department in a very desirable manner and with a start of a successful year while on trial, there is little doubt but that the system will find a permanent place in the management of athletics at Purdue.

Purdue's New Football Coach

FOLLOWING the expiration of the contract of A. L. Smith as head football coach, Cleo A. O'Donnell, of Everett, Massachusetts, was selected to fill the vacancy. Coach O'Donnell comes with an enviable reputation as a football and baseball coach at the Everett high school and, with the possible exception of Zupke, perhaps no other man in the country has made as great a reputation as a successful football coach. The Everett football team coached by O'Donnell has not lost a game since 1912 and only one touchdown and one field goal has been scored against that eleven during the last three years. Coach O'Donnell graduated from Holy Cross in 1908, having played on the football eleven four years as well as playing three years on the baseball team. He started coaching at Everett in 1909 and coached the team which was captained by Chas. Brickley. Since that time the record of his teams has been a record of successes and with the driving tactics used by Coach O'Donnell Purdue is expected to start on a new and successful football era.

1915 FOOTBALL TEAM

1915 Football Season

ENTERING upon the 1915 season with a badly crippled squad because of the loss of so many veterans by graduation, Purdue failed to realize the hope of defeating the stronger teams in the Conference and was forced to be content with defeating Iowa and her old time rival, Indiana. Although the Boilermakers were outweighed in

every struggle, their superior fighting spirit placed them on an equal with their opponents and the team is accredited with giving Coach Stagg's Maroons the scare of their lives when "Andy" Smith's team made their annual invasion of the Midway. With better material at hand and a wealth of veterans to pick from, the coming season is looked forward to with great interest by all Purdue football followers.

M. H. Overton—"Here's the proposition."

A. L. SMITH, Head Coach

of Smith's feeling of respect for Purdue football fans amounted to the departure of Andy Smith head coach of the Boilermaker football team this fall three years. Purdue still has the made friends with several players, alumni and in fact everyone with whom he came in contact.

Coming from Pennsylvania in 1913, Coach Smith established himself firmly in the hearts of the athletes and support body. Andy is the kind of a man who can inspire in a team the fighting spirit that has assisted them in every game since he has been in charge. The Indiana victory 7 to 6 with an absolutely certain touchdown, wonderful coaching and kicking from stands to meet closing his biography.

Andy has been engaged as head coach at the University of California at a handsome salary monthly and Purdue students wish him every success in his new position.

R. E. VAUGHN, Assistant Coach

Vaughan was with us again during the 1915 season as head line coach.

Pete has coached Purdue football teams for the last four years, being first obtained to help "Keeble" Moll during the 1912 season. He is another of the Boilermaker coaches who will not be back next year. "Andy" Smith has engaged him as one of his assistants at California and Pete left immediately after the basketball season for the California spring practice. Vaughn has been the chief scout on the staff attending almost all the important Conference games during the season. He has coached Purdue basketball teams the last four years and with the exception of last season was uniformly successful.

His first two years in college were spent at Notre Dame where he played fullback on the football team and center on the basketball quartet. The next year he entered Princeton where he starred on the Princeton varsity and at guard on the basketball team.

H. H. THIBAUT, Assistant Coach

Purdie was fortunate indeed to have such an able assistant as Thibault during the 1915 football season. Thibault has been director of athletics and head coach at Wabash during the past three years but was secured by Purdue as head of the public speaking department. Thibault is a former Colgate star and during his stay at Wabash developed successful teams. Football teams under his direction were for several years holder of the state secondary title. He was immediately pressed into service as one of the football assistants and was given charge of the scrubs. It was due to his efficient work that several of the third string men became regulars on the Purdue varsity before the close of the 1915 season.

J. P. PATTISON, Freshman Coach

By turning out the strongest Freshman eleven Purdue has seen in years, Coach Pattison proved himself a valuable addition to the Boilermaker football coaching staff and results of his work are expected to be in evidence next fall when his proteges turn out for places on the varsity. Some of the most promising material ever at Purdue was developed under his coaching system and several stars were brought to light by him. He had charge of the Freshman basketball squad this year and turned out an unbeaten team. He will have charge of Purdue's baseball fortunes this spring as he did last spring and it took breaks even the Boilermaker nine should find a high place in the Conference baseball ladder. Coach Pattison, besides being an all-around athlete himself, has had considerable experience in professional baseball and Purdue's baseball interests will be well taken care of.

F. A. BLOCKER, Center

Captain Blocker, playing at the pivot position all year, leaves behind him the greatest record of any football player on the squad. Unanimously chosen by all the prominent critics for a berth on All Conference and All Western elevens he stands out conspicuously as Purdue's individual star in every game played last season. Possessed of a wealth of fight and experience he made an ideal leader and Purdue will be greatly weakened without him next year. A hard and sure tackler, a tower of defense, "Black" will long be remembered by all loyal Purdue gridiron followers as one of the greatest Boilermaker centers of all time.

P. H. HAKE, Left End

Hake, the captain elect of the 1916 team, was truly one of the star performers on the 1915 team. During the previous year he played on the third team. During the present year he played regular end on the varsity after the first few games and at the close of the season was elected captain of the 1916 Boilermaker team. His work in every game was sensational and "Red" was acknowledged by all who saw him play as a star in his position. Hake plays forward on the varsity basketball team and runs the half on the track team. He is regarded as a capable leader and All-Western honors are a possibility for Hake next year.

A. R. FINN, Quarterback

Finn, although one of the smallest men on the team, more than made up for his lack of size by aggressiveness. He is a good thinker and a steady player, knowing just what play to use at the right time. He played well in every game and as a field general is above par. His forward passing in the Iowa game brought the ball within scoring distance for Pulis' toe several times and in the Indiana game he caught a pass from Pulis on the I. U. six yard line which made the Boilermaker score possible. The graduation of Finn will leave a big hole in the team, and all regret that his gridiron days are over.

M. J. STINCHFIELD, Right End

Stinchfield played his third and last year as end on the varsity. He is a star all-around athlete, being captain and guard on the basketball team in addition to his football work. He is a valuable end, both on offensive and defensive work, and an expert at handling the forward pass. "Stinch" is a quiet, steady, conscientious worker and is always on the job. It was largely due to his fast work that the Crimson players made no gains off Pulis' punts and his all-around playing during the season showed the finished player that he was. Stinchfield was selected on the All-State team for the second year and his loss will be keenly felt by the team next year.

K. R. BISHOP, Fullback.

When a vacancy appeared in the fullback position last season, "Fat" gave up his place at the pivot position and filled up the vacant backfield position in good shape. Although a heavyweight, he possessed the fight and aggressiveness so necessary to a backfield man and played his position in nearly every game this year. Bishop suffered from numerous injuries during the latter part of the season and did not get into the Indiana game because of them. With a lot of experience to back him, "Fat" was a valuable man on the defense, and a harder fighter is hard to find.

V. T. OXER, Fullback.

When Bishop was out of the game with injuries Oxer was the logical man for the place and his playing exceeded the expectations of all the gridiron followers. In the Indiana game he played his best game and carried the ball for long gains whenever called upon. "Ox" got into the game several times last season and performed creditably whenever given a chance. He played a steady, consistent game in every instance and was a power on the defense. This was Oxer's second year on the Varsity and it is to be regretted that he will be lost by graduation this year.

P. S. MASON, Right Guard.

Coming to the front in a striking manner Paul made good with a vengeance and held down a regular position at guard all last season. He was one of "Andy's" most dependable forwards and will be greatly missed in the line next year. In the Chicago and Indiana games he did some sensational work and outplayed his opponents in nearly every contest last season. His wonderful fighting spirit and jovial disposition made him a favorite on the gridiron. Mason was a very strong defensive as well as an offensive player and his weight combined with a wealth of scrappiness made him a very valuable line-man.

C. C. PULTS, Right Halfback.

"Pultsie" enjoyed the best year of his college career at the halfback position this season and without his help the team would have been badly crippled. Playing with dogged determination and sticking in every game like an iron man, Pults made an enviable record for himself this season and he will be greatly missed from the team next year. In the Iowa game as well as in the Indiana contest Pults was a veritable scoring machine himself and victory in both cases was largely due to his wonderful kicking and open field running. The strongest backfield man on the squad this year, "Petie's" place will be hard to fill when next season's football session begins.

F. L. WAGONER, Left Half.

"Polly" came to the rescue when the material for the backfield was short and played his position with that fight and consistency so characteristic of his playing. A harder worker could not be found and what he lacked in weight he fully made up in scrappiness. Late in the season he suffered an injured hand which kept him out of the game for the rest of the season. Walter has also won his "P" in basketball and baseball and has made a record for himself as an all-around athlete. "Polly" will be missed when next year's football season begins and another man must be developed for the place left vacant.

J. A. McINTOSH, Left Guard.

McIntosh came to us from the University of New Mexico, after several years' work there. "Andy" Smith discovered him during spring practice last year and from that time on coached him for a place on the team. He was tried out in the backfield during spring practice but in the fall was used as a sub-linesman. He played in several of the big games during the season at different positions in the forward wall and was found a strong reserve. McIntosh graduates this year and it is to be regretted that he was with us but one year.

M. J. PROUD, Left Guard.

Playing his first year on the Varsity, "Babe" showed his worth in every game in which he took part and great things are expected of him next year. His weight, combined with his fight and aggressiveness, made him a valuable linesman and before the season was over he was looked upon as one of the mainstays in the line. Although the youngest member of the team he came to the front in a hurry when given a chance and played his position at guard regularly during the whole season. With another year's experience he should be one of Purdue's most dependable forwards.

C. A. BUEHNER, Left Tackle.

With the shifting of Captain Blocker to center from his old position at left tackle a vacancy was caused which was filled admirably by one of the hardest scrappers on the team. "Beak" played in every game last season and displayed his worth in every one. His playing in the Indiana game was little short of sensational and his work in the Wisconsin game deserves special mention. His defensive and offensive work was of a high order and a surer, harder tackler was hard to find. Although this was his first year at a regular position he was one of the mainstays in the line and great things are expected of him next year.

C. MONTGOMERY, Halfback.

Montgomery proved himself the hardest working player on the Boilermaker squad during the three years he played on the gridiron. The first two years he played on the team at end and halfback and during the present season has filled in at halfback in several of the big games. In the Kentucky State contest "Monte" played a whirlwind game at half and made consistent gains through the Kentuckians' line. In fact in the contest against the Cornerackers he played the best game of any member of the team. He always showed the "stick-to-it" spirit which comes out a winner in the end. "Monte" is one of our Seniors and will be missed from the squad next fall.

W. B. VAN AKEN, Right End.

One of the fastest men on the team was Van Aken. During the first part of the season Coach Smith used him in the backfield where he played the year before but finding a lack of strong material at end, Van was given one of the wing positions. He was a speedy man at end and it was greatly due to his good work that the Iowa game was a Boilermaker victory. Van Aken is also one of the Boilermaker track stars and is one of the star performers on Coach Wilson's team. "Van" has still another year on the football team and great things are expected of him next year.

W. J. BERNs, Right Tackle.

Although playing his first year on the Varsity, "Bobbie" made good at once and played regularly at right tackle. Inherited from the Sophomore class, Berns came as the steadiest player that was handed down by the 1915 Freshman eleven. With plenty of weight and lots of fight and grit he is a powerful player and will make the critics sit up and take notice before he graduates. A great player on the offense and a handy player on the defense, he was one of the Boilermakers' best bets as a forward. He has two years yet to play and if he improves as he has done this year a high rank will be accorded him before he graduates.

R. D. LANDIS, Halfback.

Landis, a star on the gridiron two years ago, entered school again this fall and immediately made good on the football team. "Andy" used him in several of the big games early in the season and when the final contest came Landis was the regular halfback on the Boilermaker varsity. His spectacular defensive work in the Indiana game was remarkable and he should be an ideal man to act as Abrell's running mate on the 1916 varsity. In addition he is one of the star performers on Coach Wilson's track team and is expected to win honors in the sprints in all the meets this spring.

R. T. ABRELL.

"Dick" Abrell, after the sensational showing made in 1914, was counted on as the star of the 1915 gridiron team. While working during the summer he caught his arm in a milling machine and it was so badly mangled that he was not able to try out for the team during the past season. However, he was out on the field every evening watching the work and helping the team in every possible way. He was given the right to continue to wear the "P" at the close of the season. Abrell has dropped out of school for the present year but will be back again next fall. Abrell will be in condition and should prove a tower of strength in the Boilermaker backfield next year.

A. S. ELDRIDGE, Left End.

Eldridge played his second year on the Boilermaker varsity. While he did not play regularly he substituted in several games during last season and was a valuable man at the end. Injuries kept him out of several of the games. "Stan" can handle a forward pass and is both a strong offensive and defensive man at either of the wing positions. It was largely due to his intercepting a pass in the Wisconsin game that one of the Badger rushes toward the Boilermaker goal was stopped. Eldridge is one of the likely candidates for one of the end positions on the 1916 varsity.

Anna Klins—"Won't he make a good looking Senior?"

Baseball 1915

UNDER the direction of B. P. Pattison the 1915 varsity baseball team completed a moderately successful season. The team started indoor practice in the Memorial Gymnasium early and was in good condition when the outdoor work commenced.

Wabash defeated the Boilermakers in the first game but they came back strong in the next games, defeating our old rivals, Indiana and Northwestern, besides Del'auw and

Rose Poly, before dropping a hard fought eleven inning battle to Illinois 2 to 1 at Champaign. The team finished the season strong, defeating Ohio 5 to 1 and Chicago in the last game of the season by a 2 to 1 score.

The record for the season was fairly good and with the number of old men back and the several strong Sophomores in the line-up the team should have even a more successful year than last.

B. P. PATTISON, Baseball Coach

COACH B. P. PATTISON made his first appearance on Purdue's coaching staff last spring when he took charge of the baseball men. Although handicapped by the graduation of several mainstays, Pattison whipped together a team from green material that landed sixth place in the Conference running last year and with an even break in luck would have landed much higher. Coach Pattison came to Purdue with a great record as an athlete and with experience as a professional player that was reflected in the team he turned out last season. This year Pattison will be found in the same capacity and a winning team is expected from him.

N. S. STANDISH, Center Field.

Captain Standish, of the 1915 varsity, was a natural ball player and was an ideal leader for the Boilermaker nine. "Miles" was shifted from left field to center field early in the season to fill the position left vacant by Oliphant's graduation. He filled the middle field in fine style and could be counted on to grab anything in his territory. In addition he kept his batting above the average and once on base he was a terror to the opposing pitchers. His graduation leaves a hole in the Boilermaker lineup which will be a problem for Coach Pattison to fill this spring.

E. N. WEBER, Second Base.

Weber, captain-elect of the 1916 team, was one of the sensations on the 1915 varsity baseball team and in almost every game the crowd was thrilled by some sensational play by the star second baseman. His success as a second baseman was due to his sure fielding and accurate "peg." His hitting was consistent and timely. "Web" practically won the Northwestern game by two well placed hits and some fine fielding which cut off several Purple runs. Weber was selected on the All-Conference team at the close of the baseball season and Purdue rooters look for great things from him this year.

W. BRUCKMANN, First Base.

With the shifting of Captain-elect Weber to the keystone sack, the initial depot was left without an owner. Because of his height and fielding ability "Bruck" was shifted from the pitching staff and placed at the vacant position. Although not noted for his ability as a slugger, Bruckmann generally managed to deliver when a run was needed. His whip came into good play with dire results to the runner in many of the games and his clean fielding was the outstanding feature of his playing during the entire game. His graduation left the team without a reliable man for his position and a new recruit must be found for the place.

J. R. FINN, Shortstop.

Finn played last year at short, filling the position left vacant by George the year before. He filled the new position equally as well as he had second base the year before and his steady playing, hard hitting, fourth on the team, and polished fielding were evident in every game. He was a worry to the opposing pitcher when on base and led the Boilermakers in stolen bases. In addition he has the real baseball instinct and knows just what to do and how to do it at the right time. "Johnnie" will play again this year and there is no fear about his position on the team.

R. D. KAUFMAN, Pitcher.

"Kauf" has proven his ability as a pitcher. In his first year Kauffman played on the Freshman team and pitched exceptional ball. This season "Kauf" has shown his ability to handle the ball not only during the entire game, but in a pinch. He is cool and level headed at all times during the games. In addition to this he had a larger number of strikeouts to his credit than any other pitcher on the team. Great things are to be expected of Kauffman during his remaining years at Purdue.

R. A. BOZELL, Right Field.

"Buzz," as he is known by everyone on the campus, has succeeded in making his reputation among the baseball enthusiasts of the Old Gold and Black. During his Sophomore and Junior years Bozell made the squad but was unable to make the team. During these two years he caught on the scrubs and started out the first of his Senior year playing the same position. However, Coach Pattison soon transferred him to right field on the team due mainly to the great improvement he had made in his batting. The loss of "Buzz" by graduation will be keenly felt by the team this coming season.

C. S. KISTLER, Left Field

Kistler, a senior pitcher on the 1914 Boonemakers varsity, was one of the men who made good at an other position on the 1915 varsity. He began the season again on the slab but because of the wealth of material, he was soon transferred to the field where he suited the whole season. "Jerry's" hit won the Chicago game, the last on the Big Nine schedule. He was sent in in the ninth inning as a substitute batter for Loy, with the score tied, one to one. He knocked the first ball just outside the foul line but the next one went clear and Bozell crossed the plate with the winning run.

H. S. BENSON, Left Field

"Bennie" came to the rescue of a weakened outfield last season and played a consistent game during the entire time he was in the lineup. Benson could be depended upon in a pinch and thus together with his promise at the bat gave him a place on the varsity. Kistler and Benson alternated with each other in holding down the left garden but during the latter part of the season "Bennie" held full sway in the left domain. With some improvement in the batting line Benson should make one of Purdue's most dependable outfielders in his Senior year.

P. L. WALTER, Catcher

Walter, a substitute last year in the outfield, was given a chance behind the bat early in the year and he immediately proceeded to make good. He was always on a leg and there were few opponents who made the way safely from first to second by theft. "Pawly" led the team in batting, tying Weber for first place. He was a dangerous man in the pinches, too, and a number of runs were sent across by his timely hitting. In addition, he was third in fielding on the team.

W. E. SHRODE, Pitcher

Shrode kept up his record started in his Sophomore year by adding three victories to the list last year. In the Northwestern, Rose Poly and Ohio State games, "Bill" was in good form and twirled a victory in each case. His fielding was of a high order, and his record of winning every game in which he was sent speaks well for his ability. He did his best work in the last game he pitched, that with Ohio State. In this fray he displayed unusual coolness and control and the Buckeyes could do nothing with his twisters. This is Bill's last year on the varsity.

N. H. Loy, Pitcher.

A test at from the Sophomore class, Loy ended up the season in a whirlwind manner by his clean victory over Chicago and gave promise of being Purdue's most reliable twirler for next year. Nolan was bothered with a sore arm most of the year but despite this handicap, DePauw and Chicago fell easy victims at his hands. In the first Chicago game fourteen men were laid low by his curves and although the game was lost it was a brilliant exhibition of pitching. With such splendid form as is characteristic of his playing, coupled with lots of speed, Loy gives promise of being Purdue's most dependable twirler before he graduates.

C. EBERT, Third Base.

Ebert played his first season on the varsity last year, filling the position at third left vacant by Kinzer. He is a finished fielder and a fair batter. He hit safely in the Chicago game and later scored the run which tied the score. He was a clever base runner and was one of the leaders in stolen bases. He is a three-year man, entering school as a Sophomore two years ago, and this year he completes his education and his baseball career on the Boilermaker diamond. At present it is a question whether or not he will be eligible for the team this year but it is hoped that he will be seen again in an Old Gold and Black suit.

1916 INDOOR TRACK

The Track Season

F. F. CAMPBELL, '17.
Track Captain.

UNDER the direction of Coach James Temple, Purdue had one of the strongest outdoor teams in 1915 that they have ever had. Meets were won from Ohio State and Northwestern by large margins while Wisconsin and Chicago succeeded in downing the Boilermakers as did Notre Dame in the State Meet by a little over two points. The Boilermakers were a close second in the State contest and were only beaten out because of the sensational work of Myers of DePauw in the mile and half-mile.

Owing to the untimely death of "Jimmie" Temple, Charles H. Wilson has been secured as head track coach with Dr. Morrill as assistant. Wilson is already one of Purdue's most popular coaches and has had good success with the team indoors. Under his direction the team gave Chicago the scare of their lives and defeated Northwestern decisively besides scoring in the conference indoor meet. With many "P" men ready for the 1916 outdoor season a banner year is expected.

J. TEMPLE (Deceased)

"Jimnie," as he was affectionately known by all who knew him, was easily the most popular track coach Purdue had had for many years and his untimely death was a great surprise to all. He was apparently in the best of health but was taken suddenly ill from heart trouble during a minor operation and never regained consciousness before his death. "Jimnie" had a fairly successful outdoor season and had really made a good showing with the squad. The squad developed fast and at least several unknowns were heard of after Temple had taken charge of the team.

C. H. WILSON, Head Track Coach.

Backed by the enviable record of turning out the National Championship track team in 1914 as well as similar successes in track work, Coach C. H. Wilson came to Purdue last fall to guide Purdue's fortunes on the cinder path. To say that Purdue was fortunate in securing such an able man at the head of track affairs would be putting it mildly, since Coach Wilson is recognized the country over as one of the most capable track authorities and trainers to be found. His success in the short time he has been at Purdue speaks louder than words as to his ability, and track athletics have taken on renewed vigor since his inception here. This year as well as next year are looked forward to as banner years in track at Purdue with Coach Wilson directing the work. He will be assisted in the work by Dr. Morrill.

DR. MORRILL, Assistant Coach.

The new system of athletics brought Dr. Morrill to Purdue as director of the gymnasium, doctor, and assistant track coach. In the latter he has charge of all the field event men, leaving Coach Wilson more time for the sprints and distance runners. Dr. Morrill is a graduate of Vermont University where he was well known as an athlete, shot putter and high jumper, but particularly in the broad jump where he held a record well over 21 feet. He has had charge of all the physical examinations of students and has been trainer and doctor for the football and basketball teams, as well as the track team.

CAPT. C. M. EAST, Dashes

By taking the largest number of points for his team during the 1915 track season, "Jerry" worthily upheld his station as leader of the track men and was Purdue's strongest man in the middle distance runs. Although good in the short dashes, Capt. East made most of his points in the 220 yard sprint and the quarter. He lowered Purdue's record for the latter on two successive Saturdays, and is at present holder of the record for that distance. An untiring runner, he finished his races without apparent effort and would trot off without hesitating after breaking the tape. The loss of Jerry to this year's track team will be very keenly felt and it will be next to impossible to fill his place.

H. S. WHITCOMB, Hurdler.

Ineligible until his Junior year, "Whit" was unable to make use of his ability as a hurdler until his Senior year. Coming to the front as the best hurdler on the team, Whitcomb made good in a hurry and placed high in nearly every meet last year. Of splendid stature for a hurdler and displaying excellent form "Whit" ran the hurdles in great shape and was a serious contender in all of Purdue's dual meets last year. He represented Purdue in the Conference meet last year and his graduation will seriously weaken the Boiler-makers in this event. A consistent man in his event, "Whit's" place will be hard to fill on this year's team.

Due to an inefficient assistant board indoor track letters had not been awarded at the time the Debris went to press. The men given individual receipts are those who in the opinion of the Debris editors will be awarded letters.

F. F. CAMPBELL, Mile and Two Mile

Campbell, who is the captain elect of the track team this season, was one of the best milers that Purdue has ever put out. He won his "P" in the Wisconsin meet in the spring of 1915 by running the mile in 4:26²/₅ and establishing a new Purdue outdoor track record for that event. Campbell is not only a miler but he is also strong in the two mile event. His best record in the two mile is 10:10. As this is Campbell's Junior year at Purdue, the Boiler-makers will be able to bank on him to win the long distance events next season.

G. E. KLIPPEL, Two Mile.

"Klip" was one of the most consistent gatherers of points on the team last year. Klippel did not come out for track until late and he began to develop in his Junior year. In his last year here he placed in five different meets. In the Ohio State, Wisconsin, Northwestern and State meets he landed a second in each and in the Chicago meet he placed third. "Klip" was a hard worker on the team and added a great many points to Purdue's score in the different meets. The Boiler-makers lost a strong man when Klippel graduated.

C. R. STAHL, Pole Vault and High Jumper.

"Jakie" made good in a hurry and showed his ability as a high jumper in his Junior year by tying the Purdue record when he flew across the bar at 5 feet 10 inches. This was the best mark Stahl was ever able to do although he was a consistent performer in this event during his Junior year. Last year "Jakie" was unable to get into shape and had to content himself with taking the minor points in this event and grabbing a few extra tallies in the pole vault. His place in both events will be greatly missed this year since Purdue is extremely weak in these departments.

V. J. MANN, Half Mile.

Verner won his letter in the Indiana meet year before last and has proved a consistent runner in every meet since that time. He was Purdue's best representative in the half until Van Aken came in last year and took his place. V. J. could be depended upon to do his best and took points in nearly every meet in which he was entered. Mann saw three years of experience on the varsity track squad and took many points for his Alma Mater while a member of the team. Verner was at his best on the outdoor track and because of his hard work and consistent running deservedly won his letter for his three years' work.

E. L. APPLGATE, Dashes.

"Apple" got his name on the honor role of track athletes by winning firsts in the 100 and 220 yard dashes in the fast time of 19 and 22 seconds respectively in the 1913 Missouri Valley Meet and continued to be a consistent point getter in every meet he was entered. Last year Applegate was bothered the entire year with a strained tendon and was unable to keep up his usual stellar performance on the cinder path. Although a big man, weight did not seem to worry "Apple" in the least and his loss will be keenly felt by this year's track team.

H. W. CROWE, Shot Put and Discus.

By taking the second largest number of points for his team during the 1915 track season "Herb" proved his dependability in every meet that he took part in last year. Although only a Sophomore he succeeded in putting the shot more than 42 feet and with two more years of experience before he graduates a high mark should be hung up by him. He represented Purdue in the Conference Meet last year and bids fair to repeat the trick again this year when he is expected to place well up in the event. "Herb" won his letter in the Chicago meet and continued to be a heavy point taker in every meet afterward.

A. G. BAUERKER, Hurdler.

One of the most dependable point getters on the team and backed up by lots of experience, Bauerker was one of Coach Temple's most consistent men last year. Well built for a hurdler, Bauerker clears the hurdles in fine shape and with the graduation of Whitecomb will be left the task of being Purdue's mainstay in this event in his Senior year. He has represented the Old Gold and Black at the Conference Meet for two successive years and will repeat the trick again this year in all probability. This year is his last year on the cinder path and much is expected of him before he dons his track suit for the last time.

W. M. LARGE, Mile and 880.

"Pete" has developed into a fast and reliable track man. In the meets last spring he made fast time and placed in two of them besides running in the Drake Relays and at Pennsylvania. Large took first in the mile in the Northwestern meet making it in 1:33 $\frac{1}{2}$ and also took fourth in the mile event in the State meet. In the Drake Relays "Pete" made the half in very fast time cutting it down to 2:01 $\frac{1}{2}$. As "Pete" is only a Junior this year Purdue is very fortunate to have him to bank on for a strong point winner next season.

W. B. VAN AKEN, 880.

"Van" has shown the track enthusiasts of Purdue what a real half miler can do. During the latter part of last season "Van" made a record for himself when he stepped off the half mile in the Drake Relays in 1:56 $\frac{1}{2}$. He also ran with the team at Pennsylvania but was unable to make as fast time due to being spiked in the preliminaries. "Van" took second in the half mile in the Ohio State, Chicago and Wisconsin meets and also third in the meet with Northwestern. The Boilemakers are only too fortunate in having Van Aken for the team next year and there is little doubt but what he will break more records.

W. R. MILLER, Two Mile.

By taking the distance grind in the Northwestern meet last year and establishing a new Purdue record for the distance "Red" came to the front as one of the fastest two milers in the conference. Miller set a mark of 10 minutes 3 $\frac{1}{4}$ seconds in the event and continued to win points in every meet in which he was entered. Size made little difference to "Red" for although the smallest member of the track team, he was able to negotiate his event in fast time in every meet. Miller was unable to take part in the indoor track season this year but high hopes are entertained for his return to the track squad for the outdoor season.

H. P. SCHIENBERG, Javelin and Broad Jump.

Schienberg was Purdue's strongest man in both the broad jump and in the javelin throw last season. In the Wisconsin meet Schienberg won his "P" in the javelin throw. He is not only strong in these two events but has shown good form and time in both the low and the high hurdles. He was a good all around man last year, being the best man in school in both the javelin throw and broad jump. In the Wisconsin meet Schienberg won the javelin throw on 133 feet 9 inches. Due to the fact that he has one more year in school, the track team will be greatly strengthened by his ability.

L. D. ATKINS, Two Mile.

Coming to the front with a rush, Atkins proved to be the find of the season this year and gives promise of becoming the premier distance man in the Conference before he graduates. "Tommy" won his "P" in the Chicago meet when he covered the two mile in record smashing time. Although winning his numeral in his Freshman year, Atkins did not begin to develop until this year and with two more years ahead of him before he graduates, great things are expected of this little distance runner. He now holds the Purdue record for the two mile, although making it on the small indoor track. He is also a cross-country man and finished well up in the Conference meet last fall.

P. PRINS, Discus and Shot Put

Prins was one of Purdue's mainstays in the shot put this past season. He is also a discus thrower of no mean ability, placing second in this event in the State meet and third in both the Chicago and the Ohio State meets. In the shot put Prins took first in both the Chicago and the Ohio State meets and second in the Northwestern and the State meets. In the Chicago meet Prins made his record by putting the shot 41 feet 3½ inches. Prins, being a Junior this year, will prove a valuable asset to the team next year.

C. F. KELLEY, Mile.

By placing first in the mile in the Northwestern meet Kelley won his letter for the first time. Although running a few races in the two mile Kelley goes best in his own event and teams with Capt. Campbell in nice shape. Consistent hard work transformed Kelley from a mediocre performer into a runner not to be slighted by the best in the conference. He has taken several points for his team this year and more is expected of him next year. This was his first real year in track work and when given a chance he was not long in proving his worth.

V. H. CAMPBELL, Half Mile.

Through persistent effort and consistent work, Campbell followed the precedent set by his brother and became a wearer of the coveted letter for the first time this year. In the Northwestern meet Campbell took the half handily by winning over his closest rival by a good margin. This is Campbell's third year in track athletics at Purdue. Last year he was alternate on the relay team and made the trip to the Drake Relays and to Penn. State. This year he is expected to take the place of "Jerry" East, who was lost by graduation last year, and is expected to fit in nicely because of his experience. He is also a member of the cross-country team.

H. K. CARTER, Two Mile.

"Nick" started out in a hurry on his track career by winning his "P" in the State meet held at Purdue two years ago. Carter led a big field of starters in the two mile and was the first to break the tape in the event. Since then he has placed regularly in outdoor dual meets and can be relied upon to take points in the distance events in nearly every meet. Carter has been a member of the cross country team for three years and last season was honored by being elected captain of that team. This is "Nick's" last year in Purdue's track athletics.

R. D. LANDIS, Quarter Mile.

After dropping out of school for a year Landis came back to school last year and took up track work as soon as the football season was over. Although not such a stellar performer on the cinder path as on the gridiron "Rex" has won his right to wear the "P" by taking first in the quarter against Chicago two years ago. Landis also runs in the shorter dashes, although he is at his best in the 440. Strong competition in his event in the early part of the season forced Landis to be content with a lower place than first, although better things are expected of him when the outdoor season begins. "Rex" has two years more on the cinder path.

H. F. FYE, Hurdles.

Fye is one of the men on the track team who is a consistent worker and a man who is at it all the time. He began running in high school and captured places in the high and low hurdles at Purdue in the State High School meet the year before entering here. He has run on the Purdue team for three years and while he has not won many firsts he has scored points in quite a number of dual meets. He has worked harder, probably, than any Senior on the Boilermaker team and it goes without saying that he deserves all the points he wins.

ELMER Q. OLIPHANT, Purdue '14

West Point Military Academy '18

PURDUE students for the past few years have universally recognized Elmer Q. Oliphant as the greatest of Purdue athletes but it is only during the last year that he has received universal praise because of his wonderful athletic prowess.

"Ollie," as he is familiarly called by everyone, has made a wonderful record at West Point since he entered as a plebe two years ago. He immediately proceeded to make good on the baseball team and landed an outfielder's position at once. He has played on the Army baseball team the last two years and it has been stated by a New York scout that he is the best college baseball player at the present time. He subbed on the football team during the first year but played regular basketball forward and was a star in all contests, leading the team in scoring. Besides this he also found time to run on the track and in his old standby, the 220 yard hurdles, set a new Army record last year of 26 seconds flat. He played baseball again last summer and lead the team in batting.

But it was this fall during the football season that he came into his own. After starring at halfback in every game he finished the season in a blaze of glory by practically winning the annual Army-Navy clash by his spectacular work. He was placed on Walter Camp's All-American team and was universally selected on all the Eastern elevens.

During the winter he has again been playing basketball besides doing some boxing, wrestling and hockey playing. Recently at the annual meeting of the athletic board he was awarded four "A's"—football, baseball, basketball and track—and it was announced that he was the first Army cadet to win letters in all four branches of major sports. He has still two more years and it is believed he will better his former marks in his last two years of competition for honors.

TWO-MILE RELAY TEAM

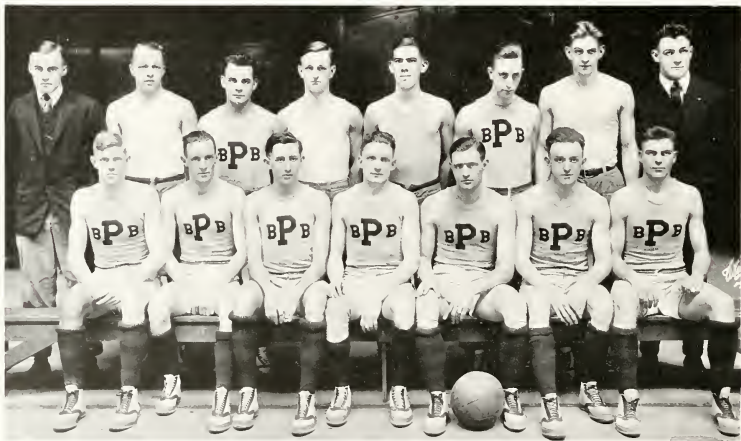

Drake Relay

PARTICIPATING for the first time in the Western Intercollegiate Relays run annually at Drake University, Purdue came to the front and won from a fast field in the two mile relay event in exceedingly fast time. The distance was covered in 8:01³/₄. Van Aken, who ran last for the Boilermakers, finished 60 yards ahead of his nearest rival and did the lap in 1:56⁴/₅, thus beating the former record by almost 5 seconds. Large, F. F. Campbell, East and Van Aken composed the team representing Purdue in the event. East, captain of last year's track team, turned the distance in 1:59 and was followed by Large in 2:01³/₅ and Campbell in 2:04¹/₅. V. H. Campbell was taken as the alternate of the team but did not enter the race. In these relays the best teams in the West compete and Boilermaker fans consider it no small honor in the showing of the team which placed first last spring. This year Purdue will probably again be represented, although prospects are less bright than they were last year for winning the classic. Purdue may be entered in the four mile event this year since the Boilermakers have a strong quartet of milers.

Pennsylvania Relay

AFTER being so successful in its invasion in Western relay circles, Purdue's two mile relay team was sent to the University of Pennsylvania relay meet and competed against the fast Eastern teams. The Boilermakers arrived in the East in poor condition after their hard trip and were unable to put up as strong an opposition as they were capable of, with the result that Purdue finished in fourth place. One of the members of Purdue's team was spiked during the race and this probably cost the quartet first place. Yale, Chicago and Princeton finished ahead of the Boilermakers. Yale won with a record of 7:58⁴/₅ while Purdue followed 3 seconds later. A new record was set up by Yale, the best former time being 8:00 held by Illinois. Harvard, Yale, Dartmouth, Pennsylvania, Princeton, Chicago, Michigan, Syracuse and Purdue had teams running in the two mile event. This year Purdue will probably be represented in the classic and should be able to give a good account of herself. With three veterans of the team and last year's alternate to pick from there is little reason why Purdue should not again win laurels in the relay races this year.

 Bottom Row—Hart, Brockenbrough, Mosaman, Hake, Stinchfield (Capt.), Koenig, Williamson.

1916 BASKETBALL

"PETE" VAUGHAN, Basketball Coach.

Coach Vaughan had charge of Purdue's basketball men again this year, this making his third year with the Boilermaker quintet. Lack of material proved too great a handicap to overcome this year and Vaughan's team was forced to the cellar position on the Basketball ladder. Injuries to his men as well as ineligibility rulings prevented Purdue's real strength from being exhibited more than once or twice during the whole season. Coach Vaughan will have charge of the University of California's Basketball men next year.

Basketball 1916

PURDUE finished the most disastrous basketball season this winter that the Boilermakers have experienced in years. Lack of material coupled with injuries and ineligibility rulings sufficed to rank Purdue on the lower rung of the Conference basketball ladder last season. The team, however, showed spurs of form at times and the victory over the strong Northwestern five in their second engagement, found the Boilermakers going at their best speed during the season. The material this year was only mediocre and some of the most crucial games found Purdue without the services of her mainstays who were out because of injuries or ineligibility. With a new coach to guide Purdue next year and a wealth of strong material coming from the yearlings, a strong team is expected to compete for the Old Gold and Black.

M. STINCHEFIELD, (Captain) Guard.

Chosen to captain the five last season, "Mike" aptly filled the place of a leader by his hard consistent playing and his "never say die" fighting spirit which was evident in every game he played. "Stinch" has played on the varsity for three consecutive years, besides being on the Freshman team of 1912. Although not a spectacular performer, Stinchfield could always be relied upon to hold down his opponent in nice shape and every game found him in the lineup ready for his part of the battle. A born fighter, "Stinch" followed up his success as a varsity foot ball man by coming out and making the basketball team and has held down the floor guard position ever since.

L. B. MOSIMAN, Center.

Gaining considerable prominence in basketball circles in his Freshman year, Mosiman continued to make good and landed a place on the varsity the following year. Last season an injury to his ear prevented him holding down a regular position, although he played in the majority of the games this season. "Mose" has a good eye for the basket and the spectacular Northwestern game won by Purdue this year found him carrying away the highest number of points for his team in the game. He has one more year to play and with the experience he has gained by his previous record he should be Purdue's mainstay next year.

Due to an insufficient amount having been awarded at the time the Debris went to press the men given individual writings are those who in the opinion of the Debris editors will be awarded letters

H. W. BROCKENBROUGH, Forward.

From a sensational player on the yearling team in his Freshman year to the heaviest point getter on the varsity in his Senior year, is the record of Brockenbrough, who was the mainstay of the team last season. With two years' experience on the varsity behind him he played Purdue's best game in most of the contests this year and was in every game played by the Boiler-makers. In the last Northwestern game he put up a spectacular game and was responsible to a large measure, for the defeat handed out to them in that thrilling game. His place at forward will be hard to fill next year and his loss to the team will be greatly felt.

P. L. WALTER, Guard and Forward.

After making good in baseball and football, "Polly" kept going and this year found him the general utility man of the basketball team. Walter got into nearly every game this season and although short of stature, he played his position with credit whenever called upon. He played at either a guard or forward position and could be relied upon to hold up his share of the battle in any game. The hardest worker on the team, "Polly" showed that "never-give-up" spirit that all basketball men should possess, and his place will be hard to fill when the next basketball season begins.

H. H. KOENIG, Forward.

"Red" is a product of the 1917 Freshman basketball team that made good with a vengeance and has been on the varsity for two years. This year he held down the forward position in fine style and made a good teammate to Brockenbrough in every game. Koenig has a good basket eye and plays the floor in good shape together with possessing a wealth of fight and grit. Next year is expected to be a big year for "Red" since it is his last season on the team and he has had two years' experience at his position. Koenig played in every game this year and was one of the mainstays of the team throughout the season.

H. L. HART, Guard.

Although this is the first year for Hart on the varsity, he became the most spectacular player on the team in the latter games of the season because of his wonderful guarding game backed by his unconquerable fighting spirit. With plenty of height and size he promises to be the sensation of next year's team. He showed up most favorably in the North western game when he prevented the Purple forwards from scoring time and time again by the cleverest kind of floorwork and defensive playing. Hart has an abundance of endurance and has proved himself to be the equal of any guard in the Conference, although this is his first season on the team.

P. H. HAKE, Forward.

Although one of the smallest members of the team, Hake made up for his lack of size in speed and fight and proved a valuable asset to the team this year. In his Freshman year Hake made quite a name for himself in basketball as well as in football and next year great things are expected of him. He will lead the Boiler-makers on the gridiron next fall and will be available to the basketball team again next year. Paul is a hard fighter and an aggressive player and can be relied upon to hold down his part in any fray. This is the first year he has won his letter in basketball.

E. J. WILLIAMSON, Center.

Unheralded by a grand record as a player as many basketball men are, Williamson got his first real tryout this year and made good in a hurry. When Mosiman was forced out with an injured ear, Williamson came in as the logical one for the pivot position and with the limited amount of experience he has had, put up a wonderful game at center. He almost invariably outjumps his opponent at the take-off and has extraordinary powers of endurance. With one year of experience to his credit he is expected to show up even better next year than he did this year and should prove a valuable man for next year's five.

1916 WRESTLING

PURDUE UNIVERSITY

THEODORE PAULSEN, Wrestling Coach.

Coach Theodore Paulsen has had charge of Purdue's grapplers for two seasons and with the inexperienced material at hand, has developed some very strong wrestlers. Paulsen came to Purdue with quite a reputation as a wrestler and coach, and has lived up to his reputation in every particular. He has met Dr. Roller, Göl, Mamont, Gotch and other well known mat artists during his professional career and has had eminent success as a coach. Before coming to Purdue, Paulsen was wrestling instructor at Illinois and later did instructional wrestling in Chicago. With such an able coach in charge of the Boilermaker grapplers, Purdue is sure to hold her own with any other conference team next year.

1916 Wrestling Season

THIS year was Purdue's second in Conference wrestling and the game has become the most popular minor sport at Purdue. Although hit hard by ineligibility rulings and injuries to the men, the team made a fairly good showing and with a year or so more of experience a winning team should be turned out. Purdue had five dual meets last year, besides being represented in the Conference meet. Indiana's grapplers took two meets from Purdue, 10-7 and 18-10, and Chicago nosed the Boilermakers, 9-8. Purdue displayed strength in the Illinois meet and came out victors, 18-10. Iowa dealt the Boilermakers the hardest blow of the season when the Hawkeyes won, 24-0. Borum, Cutler, Noblitt and Smith represented Purdue in the Conference meet at Minneapolis and placed fairly high in the scoring. Captain Borum and Cutler won their bouts in the preliminaries but failed in the finals. Only one veteran will be lost by graduation this year and a strong team of experienced grapplers will be ready to take the mat next year.

Tennis 1915

TENNIS, during the two years the sport has been under the direct control of the Purdue Athletic Association, has received quite an impetus and the sport has become one of the leading minor sports.

Tryouts were held early in the season under the direction of Professor James, and soon after outdoor practice started the following varsity team was selected: James Riely, Weimer, Ruby, and Laird.

The team was only fairly successful, losing to Ohio State twice, Illinois twice and Indiana once. Tie meets were held with Wabash twice and Indiana once.

A class tennis tournament featured the close of the season, Worley, '18, winning the singles by defeating Turner, '16, while Turner, '16, and Moore, '16, defeated John Riely, '17, and James, '17, in a three match set, 6-4, 8-10, and 6-4, for the doubles championship.

The department of physical education has practically completed the work on the twelve new courts behind the Practical Mechanics building and these are now ready for use. They are a valuable addition to the equipment for the promotion of health as well as of athletic skill.

1916 CROSS COUNTRY

1915 Cross Country

ALTHOUGH Purdue did not this year entertain the conference cross country meet, as it did last year, the Boilermakers did hold one of the best cross country meets of the year in the triangular meet run over the Purdue course November 6. The meet proved the first attempt for the Boilermaker cross country squad and ended fairly successfully. Illinois won the meet, Purdue finished a good second, and Indiana trailed behind in last place. Mason, of Illinois, running steady throughout the whole race easily finished first in the time of 28 minutes 3 seconds, beating Large of Purdue by a wide margin. Mason ran second to Watson last year over the same course in the Conference run, which Watson won in 26 minutes 25 seconds. Grantz of Illinois came in close behind Large in third place. The Illinois team all finished close to the front with Purdue men close on their heels. Indiana runners were outclassed, their first man finishing only in ninth place.

The only other meet of the year for the Boilermaker squad was the Conference meet at Wisconsin. From the results of the triangular run, Purdue was looked on with favor for a high finish at the Conference run, but only took sixth place, although their points placed them close to several teams placed higher than they were in the final standing. The men were unfamiliar with the hills and lake side running encountered at Wisconsin. Watson won the race, finishing the five miles in 26 minutes 14 seconds, closely followed by Mason of Illinois. Schardt of Wisconsin and Felton of Wisconsin, finished third and fourth respectively. Wisconsin won the race, being closely followed by Ames. Ohio State finished third and Minnesota fourth.

Purdue Girls' Club

President Miss EMMA COCHRAN, '17
 Vice-President Miss JOSIE MCCOY, '17

Secretary Miss INEZ DEARBORNE, '17
 Treasurer Miss HELEN BOZARD, '18

WHEN Purdue was first opened to girls so few came that good fellowship was a very common thing, but as the number of coeds increased there was a decrease in the unity which had previously been characteristic of the Purdue girls. "Mother" McKrae noticed this fact, and as a result proposed the Pur-

due Girls' Club as a means of drawing all of the girls more closely together and giving them a common interest. Fifty girls constituted the membership of the club at the time of its inauguration, but now over two hundred girls make up the membership roll—a growth that pays high tribute to "Mother" McKrae's prophetic gift.

Purdue Girls' Club

During the year there are several established social events which serve the purpose of the club. At the beginning of the school year there is the campus luncheon at which the girls and a number of the faculty are present to welcome newcomers. Later follows the Purdue Girls' Dance, a much enjoyed annual function, held in the Memorial Gymnasium. Next and last is the farewell luncheon in May for the Senior girls. This is a very impressive occasion, one that Seniors never forget, and one that arouses the

true Purdue Spirit in even the most unenthusiastic Freshman girls.

Aside from these events there is the regular monthly meeting, which is of a social nature and which has proved most successful this year in promoting Purdue Spirit. Beyond a doubt the club has filled a distinct place in our school world and its growth proves beyond doubt that organization makes for all that is bigger and better for our Alma Mater.

A Fable in Slang

(With apologies to our distinguished alumnus, G. Ade, '87.)

ONCE upon a time in a stunted metropolis mentioned in Railroad Timetables as Alfalfa Center, Indiana, lived a High School Graduate.

For four Years he had been a leader of the Flock.

In fact he had backed the other two Members of the Graduating Class to the Uncut when it came to Athletics, Oratory and walking Home with the lady Teachers.

He was the only and original A-No. 1 bet of the Cross Roads, and he was a 100 Watt Mazda according to Professor Heiss of the High School.

The young Gent just mentioned who had his Name in all of the County Papers and also on the Vital Statistics Record at the Court House was labelled for life as Jonathan Apple, Junior.

This Catastrophe, however, did not prevent him from starting on his Career one Afternoon in September on the afternoon Limited on the Lake Erie.

He was bound for the outer Wurruld,—to meet and knock out such high brows as Percy Dickerson, Toots Ferry, and Tommy Hudgins.

He was to captivate the Institution known as Purdue University or in other words, of the Faculty, By the Faculty, and For the Faculty.

When the Limited wheezed into LaFayette Union Station two Days later, our Hero had his Plans laid.

He would first feed some stuff to President Stone, informing him that he would Honor the University by his presence for Four Years and then he would journey to the Lair of the Amphibion and Register.

Although he had expected the Exponent to put his Picture on the Front Page, he was surprised when his Name did not even appear in the High Class Editorials.

After being rushed by all of the Frats and getting Free Board for a Week, the poor Boob finally chose the Chi Yi Chi because this Gang had the biggest Chapter Roll and smoked Omars instead of Camels.

In the Language of the Poets he was having a Helluva Time.

This Embryo Engineer was still bent on his Career with Dame Fortune when he hit Mike's Castle during his first week's wrastle with an Assignment Card.

He did not think that he would have to submit to the System.

Alas, 'twas ever thus.

When the poor bruised Hick emanated from the Jail a few Months later, he was almost a different Being.

D. R. Johnson—"Ain't she a dude!"

They had shown him he was Wrong if They said he was Wrong if he Was Right.

They had gotten to him wrong.

During the whole Season of Pledge Button and Green Cap, the young Gent was being stepped on, and he was being shown that all is not Gold that Sparkles.

When he finally eased out of the Button and into the Chi Yi Badge, he was all to the Mustard.

He walked down State Street with his vest open and showed the Bunch around Ray Southworth's that he was a Blue Blooded Young Man.

Eventually, came the Time when the B. B. Y. M. should amble back to the Red Roofed Silo.

The Cornet Band was corneting as the ossified Nut blew into the Hole in the Woods on the afternoon Express. It was a Gala occasion.

He told them that owing to a previous Engagement, Doc. Stone had not been able to accompany him Home.

And the poor Simps believed him and had him figured as the Guy who threw the Bird Seed around the Center of Education.

After a Series of all night Hand Outs and Hoe-downs, Oswald once more Gum-shoed back to the Hedge Walk, Hamling's Drug Store and Doc. Fore's English.

He had decided to lay aside his frivolity and fussing and take the University by the Neck.

Alas, 'T was too late.

One sunny day in December, after he had been over in the Gym telling Professor Cutts a new Way to obtain Basketballs under False Pretenses, he received a call from the Fuzzy Gink who collects the "C's" and "D's."

He was told that although the Authorities always hated to do it, he was to receive the Can.

He was to be edged off of the Earth and expressed back to the dusty Cross Roads.

When Tears were used to show how it affected him he was handed a Blotter and told to flutter away.

As the Quince blew out of the Office he thought of what they would say back Home.

Finally, he kidded the blond Queen at the Five and Ten to sell him a pair of smoked goggles. He would appear in Disguise. (Ha, Ha. Soft Music.)

No bands played "Hail To the Hero" when he got off the wrong side of the train.

No open-mouthed Populace gazed at his lavender Socks and Cross-barred Shirt.

Two weeks later when the news got out that the Prodigal had returned, there were no tears shed.

The Gang around the Post Office said, "Uh, Huh," and kept on kneading the Piper.

It is sure a tough life to lead after you get the Grape Fruit handed to you at Purdue.

Moral:—Don't Joy Ride across the Levee, Get your Studies day by day, and you've got a small Chance to stick.

A. V. Stout—"Con-twist it, I thought I could."

HELEN

Long May Her Tribe Endure

I've got a girl. Her name is Helen.
 She lives on the East Side—Street Llewellyn.
 They've got a big car—a Saxon, I think.
 Her old man's a rich, influential gink.
 I took the kid home the other night.
 Alone in the parlor we turned down the light.
 Says I: "Be a sport. Gwan, gi' me a kiss."
 From then on the patter went something like this.
 Says she: "This your first or second year?"
 Says I: "My second. Why do you care?"
 "Two more," she says and heaved a sigh.
 Said it just like that, I wonder why?
 "Do you love me?" says I. Says she: "Oh no-o-o."
 Didn't say it like she meant it though.
 All at once she jumps. "Aren't you hungry?" says she.
 "Hungry?" says I. "Are you talkin' to me?"
 "Sure," she says. "C'm on out to the kitchen.
 There's a dray-load o' eats all ready for ditchin'."

Say, bo, right there I got the feed of a year:
 Ice cream, sauer kraut, cucumbers—an' beer;
 Salmon, cold chicken, watermelon on ice,
 An' lush pumpkin pie—a great big slice,
 Half an Angel-food cake, a banana or two,
 Then a quart o' preserves an' I was through.
 So bloomin' full couldn't shut my trap;
 Sleepy too, felt like takin' a nap.
 Says I: "Say kid, where'd you get the scheme?"
 "Morning Journal," says she. "Ain't that cake a dream?"
 Says I: "You're an Angel. I'm comin' some more."
 She laughed as she helped me through the door.
 "Come tomorrow night?" she murmured low.
 "You bet," says I. "Surest thing you know."
 Yes sir, I'm strong for this Helen girl.
 She's not quite as lovin' maybe as Pearl,
 But a feller to live has got to eat;
 You bet I'll stick to Llewellyn Street.

Registrar's Office—Too much like a chaplain's office in the penitentiary.

THE 8-O'CLOCK CHORISTER

Those Happy College Days

IRISE at eight and I pull my freight for a class-room, dark and dreary. "You're five minutes late," the old Prof. grate. They make me blooming weary. At a quarter past two A. M. I'm through and I seek the hay for a nap; but the bed's not there, nor anywhere; it's the work of some Freshman yap. I curl in the corner and sink to slumber and dream of the land-lady's daughter. Then—sufferin' mustard! Oh, pink lemon custard! I'm doused wringing wet with cold water. A chuckle I hear; it seems quite near; I make a rush through the dark. I encounter four chairs and two flights of stairs; from my shins I remove all the bark. When I return many lights do burn; the land-lady's out with a lamp. She spels a long yap about waking folks up and says I'm a bum and a tramp. When I get to my room some blasted gazoon has locked up and decamped with the key. I crawl through the transom and forfeit the ransom of banging my nose and one knee. At last deep repose; then shouting and blows; for my room-mate's returned from a call. He's kicking and whanging and swearing and danging and wants to come in from the hall. At last he comes over and howls like a drover, and falls from the top to the floor. Says he: "You poor fool! You fat-headed mule! Why didn't you unlock the door?" Then he snaps on the light and beholds what a blight has come to us since he left last. Chairs broken; bed's gone; penants moved, every one; room's a ship without even a mast. Room-mate starts to giggle; this makes his nose wiggle; he ceases and feels of the same. Then he curses the transom in language most hand-some and calls it a rough-sounding name. From out in the hall comes the land-lady's bawl; she's as mad as the famous wet hen. If we can't cut the

howling and yelping and growling, why, pack up and get out, right then! So we bunk on the floor, with an eye on the door, and dive into slumber amain. Then Big Ben, he awakes us, and woos us and shakes us; "Work of hog-headed Freshmen again!" 'Tis now nearly daylight; we're ripe for a big fight; we hold a brief council of war. We take some light rope, rehearse all the dope, and climb silently out o'er the door. We hie to the room where the two Freshmen croon their buzz-saw-like snore-fraught refrain. We each take a lummo; we jump on their stomachs and tie 'em and gag 'em amain. Then down to the bath-room we quietly move 'em and draw a tub-full of ice-water. Into this now we douse 'em and jounce 'em and souse 'em; they get limp as a water-soaked blotter. Then their bedding we dose and most of their clothes and return in high glee to our room. We feel we are heroes and ought to have haloes; we're no longer shrouded in gloom. Then we see that, by thunder, we've just made a blunder; it wasn't the Freshmen at all. 'Twas two Junior Ags, two beer-bloated kegs; right now they're asleep 'cross the hall. So the Freshmen we seek; they're at present quite meek; and we tell 'em we've found our mistake. As we talk the Ags, seem to them really to blame; so we tell 'em to go make 'em ache. They think the duck stuff isn't any too rough for an Ag, with such mean disposition. So the Freshmen go get 'em and souse 'em and wet 'em. The Ags, gurgle and swear like perdition. Says the whiskered Prof. bright: "Sleep eight hours a night, think good thoughts and don't learn to swear." Now such a Prof's, nutty; his brain is all sooty; he's a spouter of misty hot air.

BEVERLY VERNON CASTLE, JR.

A Class in Ec'nomics?

(8:59:50 A. M. Senior Civil advancing toward Beverly's sanctum. Doc, still addressing last class which left five minutes previously.) "—can't be, 'pon my word. Good mawnin' Mr. Eberle."

"Good morning, Professor. Doctor, what do you think of the school system of zis country?"

"Well now I'll tell yo' Mr. Eberle, it's this way. 'Cause this is ma own 'pinion, but here's th' way I look at th' mattah. Our public school system is poor, powerfully weak. Why, only yesterday, didn' ya see in th' LaFayette paper wher' one of th'—Ah believe it was a Sophmo'—ran away to Danville an' tried to marry a freshman girl? Think of it. It's a disgrace to th' nation, don' ya see? Ah tell ya, Mr. Eberle, a man's got no bus'ness askin' a girl to marry him till he's got thru school an' got a good job an' a bank 'count. No sirc. 'Taint fair to th' young lady. Ha, Ha. (9:10 A. M.—Pause as he thumbs over his class book.)

"Ah know some o' yo' gem'men don' 'gree with me, but Ah know. Look at me. Here Ah am an ol' batch, jus' 'cause Ah waited out o' respect fo' th' girl, an' Ah'm still single. Ah tell yo' gem'men, Ah'm past the foolish age. Ah'll admit ther's some o' these wimmen look pow'ful 'tractive these days. By th' way, were any o' yo' gem-men ovah in town Saturday night? Mah goodness! Ah nevah seen th' like befo'. Young girls with their dresses cleab up to thear—well, almos' to their knees, an' lots o' them ought to been home in bed. Gem'men, it's a crime Ah tell yo'. It's a downright shame. (9:20 A. M.)

"Well, Ah spose Ah oughtn' to take all this time from th' lesson, but these lil' sidelights on th' lesson is mighty in-

"GOING LARGE!"

terestin'. Well now, les see what yo' men got out o' this chapter. Now, Mr.—les see—Mr. Jones, tell th' class what yo' think th' author meant when he spoke o' monopolized commodities. (Long silence.) Now, Mr. Jones, didn' yo' get ovah this 'signment'? Now gem'men, yo' all got to get yo' readin' up. This thing won't do. (Enters a zero on the eternal records.) Ah hate to use fo'ce on a Senior, but Ah tell yo', Ah'm 'titled to Mah hour an' a half ev'ry day, an' Ah'm goin' to have it."

"Do you expect us to get this stuff up the same as we would do in English, Professor?"

"Well now, Mr. Brown, Ah'l tell yo'. Ah don' 'spect yo' to get this up word fo' word, but yo' ought to have a pretty clear understandin' o' what's in th' text. Ah know this is hard readin', gem'men, but Ah'm paid to teach yo' men Ec'nomics an' yo' all got to get it. Yo' might as well get right into it an' get it, 'cause th' judgment day's comin'."

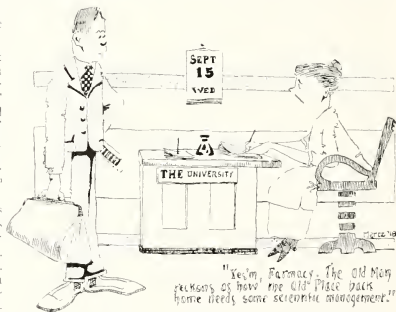

"Well,—" (Student trying to get a word in edgewise.)

"Cou'se now, I don't wan' to seem hard in mah demands, but Ah guess we understan' each other, so we can go 'head."

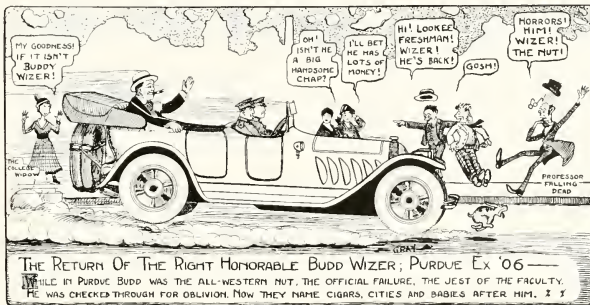

"Now Mr. Carter, yo' tell us what yo' got from this chapter. Mah goodness, this will nevah do. Ah know it's mighty hard fo' Seniors to read Ec'nomics, they got so many 'tractions an' so much bus'ness on th' other side o' th' river. (Sly wink toward Summers.) Ah don't blame yo' gem'men. When a man's worked up to his Senior year, he's 'titled to a li'l rest. But go slow, gem'men, 'cause wimmen's mighty dangerous. Yo' know, it's gettin' to be th' fad among stu-

dents to get engaged befo' they graduate; but go slow, gem'men, go slow. (Clock strikes three times.)

"Well, Ah see ma time's up. Now we didn' get very far this mawnin', but yo' take—well les see—take about—uh, say—well, take th' next ten pages, an' get it up, gem'men, mah goodness, get it up. Yo' can't get thru this cou'se without puttin' a li'l time on it. Well, tha's all fo' this time."

To "Deah" Old Indiana

I.

Says he: "Lo Jake."
Says I: "Lo Jim."
Says he: "Where's Bill?"
Says I: "Who? Him?
Why, he's at 'Indiana.'"

II.

Says Jim: "I do not know the place."
Says I: "Don't fret. That's no disgrace."
Says Jim: "You interest me sore;
Oh, gracious Jakey, tell me more."
And so I told him.

III.

"Now Bill," says I: "He's a funny feller,
When he flunked out here he let a beller.
Seemed like no one could console him a-tall;
He'd just holler around and bawl.
Then a chap from this dump, Indiana,
He gets Bill's eye with a ripe banana.
Says he to Bill: 'Now listen t' me.
In your big, red ear I'll slip a flea.
We've got a school that's just your speed,
A home fer th' feeble minded breed.
Yuh can't get drunk there; you can't get wet.

It's the dryest spot yuh was ever in yet."
An' Bill, he listened, awe-struck like,
Plumb hypnotized by this slick-tongued like.
Says Bill: "I reckon I'll give it a whirl."
Says the Ike: "That's fine; I can get yuh a girl—"
And off they goes to that wart to the south,
That speck on the map, that ash in the mouth,
Get a card from Bill, every now and then,
But he's not the same as he uste been.
No Jim, he's changed; mind's turned to dust,
We tried to save him. What must be must."

IV.

Says Jim to me: "Must be some place!"
Says I to Jim: "It's a disgrace."
Says he: "The place should be suppressed."
Says I: "Purdue is doin' her best."
"Well Jake," he says, "I must hit the road."
"Well Jim," I says, "So long! Be good!"
"Oh say," says he, "Have they got a team?"
"Heck no!" says I, "They've got a scream!"

DOC. BOND STANDING ON THE BLEACHERS WITH HAT ON WHILE BAND PLAYS "HAIL PURDUE!"

A WHY THE LAWSY HOUR I WAS DISCUSSING THE PROPERTIES OF CHLOR-R-RINE!

CO-EDS? WE HAVE THEM

THE girls of Purdue are a great little bunch. They're light as to numbers but strong with the punch. They're under a handicap—East Side's too near; but they get around that, never you fear. They live in the dorms; say, ain't it a shame? This dorm life I'd think would be awfully tame. Now and then you see one or two taking a stroll; a half an hour warm-up then "back to the pole!" The dorms have their closing hours, just like saloons; "It's time to go! Beat it!" the old lady croons. You pause on the steps, the bouncer howls, "Meg, you tell that fat dumb-head to roll, shake a leg!" Course there's diversion to dorm life at that; now it's a hazing scrape, now it's a rat. Some enthused flapper finds a starved kitten;

'bout a week later her room-mate's been bitten. Jane has a new fellow; can't keep one a week. The gink she is stringing now talks with a squeak. Maud's flunked in English; she's awfully slow; regular cut-up and darned pretty though. Now Mabel McHunk's a society dame; at each dance she crow-hops until she's all lame. The girls say to teach is the dream of their lives. John says he'll bet money they'd rather be wives. Of course we can't say whether John's right or not; but some of them act that way though, a whole lot. We perch on the fence and watch 'em go walking; some in x-rays and all of them talking. Oh well, what is life without flappers that giggle, and walk in the sunlight and whisper and sniggle?

Things We Didn't Do

How well do I remember that first day
I stepped upon the campus, gazed around
How wonderful the buildings that I found
What heavy sense of knowledge on me lay
And there within those gates I met a youth
Whose worldly air, and scholarly converse,
Did stamp him as a Junior guy or worse—
So with wide ears I hearkened him, forsooth,
Yet in my heart an inborn craftiness
Still made me pause ere I revealed my years,
'Twas well that I did listen to those fears,
For by a chance (How could I ever guess?)
He let it out, and all at once I knew
That bemed youth was but a Freshman too!

It was the first call that I ever made,
Her folks all knew that I was acting green,
Because there had been others they had seen
Who were not quite so bashful, so afraid.
I stayed and stayed. And yet again, I stayed,
I would till now be staying there, I woe—
Had not her father, large and coarse and mean,
Requested why I thus so long delayed,
I took his hint and slowly opened the door,
That done, I paused, and looking backward saw
Not she I loved, but just her angry pa—
Armed with a load. That spoiled my deal, for sure;
So, going at two terraces per flight,
I left the place just as 'twas getting light.

On one soft night I went to Ladies' Hall
The fellows told me that I must, you see—
There *was* one girl who looked right fair to me
But it was just a duty, that was all,
My hand was trembling as I smote the door;
It seemed a year before they let me in,
They stood me in the hall, and fled again,
To those dim mysteries of the upper floor.
And by and by a voice did call my name
And said "Come Up!" But I'm no such a geek—
I wasn't there for any hide-and-seek,
Or any other shady female game.
No. Never could they coax me up that climb
I grabbed my hat and left, while there was time.

It was the day my first grades home did go—
And in the lunch there was a C or two.
It hit me hard; I wondered what to do—
And so I asked the fellows, sure they'd know.
They held a council on it for an hour,
Then said:— "You know, the Monk's the works, 'round here;
You've got to make a hit with him, that's clear,
He loves to smoke—you take him a cigar."
They got me one—it must have weighed a pound—
And swore it was his brand. So to the Monk
I went with easy heart. I fed him bunk,
And then—my treasured gift unbound,
I never knew how I escaped his hit—
But since that day I've kept well out of there.

I wasn't rude; you see, I'd never heard
The motto a Freshman knew, the less he showed
Into the tub the pure, cool water flowed
And in I went before the second word,
They dragged me out, all water-logged and mad;
I felt so cold, they thought it'd do no harm
To get the paddles out and keep me warm—
And when it came to paddles, they skinned dad!
At last they quit and rested for a space—
Then told me on what terms they'd really cease;
They said I'd have to stand and speak a piece
On how I loved 'em, and a Freshman's place,
Experience sure teaches things, I knew,
I spoke my piece and lived it daily, too.

Unsung Heroes

VOLUME 000000.

SCENE: Lonesome country road in Brown County. Detective Burns and Marshal Corey lying behind brush pile at roadside.

TIME: 12:00 P. M.

COREY: Never fear, Bill. We'll get 'em if they're still alive. They'll never get around US."

BURNS: "It's risky business, Corey."

COREY: "Aw piffle! Why Bill, many's the time, when I was on the West LaFayette Police Force, I've gone out, single-handed and alone, and brung in scores of murderers. Many's the time I've druv desp-rate gangs out of the basements of West Side stores. Many's the reckless taxi driver I've taught to respect the law. This here little job ain't nothin', Bill."

BURNS: "But German conspirators are different."

COREY: "Rot, Burns just rot! They'll never get by us."

Sounds of many feet are heard. Darkness and a thick fog hides the approaching party. Voices: "Oh God!" "I wish I was home!" etc., etc., etc.

Detectives rise nervously. Burns produces manacles, an automatic and a pocket flashlight.

COREY: "Stand fast, Bill—don't give an inch."

Footsteps are much nearer.

At the last second, Burns flashes his searchlight on the advancing host. A terrific outcry ensues.

Suddenly, from out the mass of struggling beings, a gigantic form appears and strides toward Burns. It is O. Frost Cutts.

FROSTY: "This is MY party—what do you mean, Sir?"

BURNS: "You are under arrest." Covers him with gun.

FROSTY: "ARREST! What Charge?"

BURNS: "German conspiracy—Heiss, Gunn, Sauerhering, and the rest of you."

FROSTY: "Why these are only five Purdue students, out for their little weekly walk!" He turns to fellows. "Step up, men, and show your assignment cards."

The cards are shown, and the party is freed.

Burns notices that Corey is absent. "COREY! COREY!" he calls, but there is no response.

Party, with Burns, proceeds to county seat.

* * *

NEXT MORNING: Burns at table, breakfasting in leading hotel of Brown County, with O. Frost Cutts. Messenger enters and hands Burns a telegram. Burns reads—New Orleans, Miss.

Dear Bill: Arrived here at 1:43 A. M. Roads a little muddy, but I stood the trip well. Left for help when fight started. Wright if you need any.

A PAINFUL EPISODE IN THE LIFE OF MR CHAWNK RANQUE TERBACKYER, SENIOR AG. by H.L. Gray, '17

MATHEMATICS

He was teaching Liza arithmetic,
 He said it was his mission.
 He kissed her once, he kissed her twice,
 And said it was addition.
 And then he added smack on smack,
 With greatest satisfaction—
 He quietly took a few from her,
 And said it was subtraction.

Still as they sat there side by side,
 In mutual admiration—
 She straightway paid him back ten-fold,
 And called it multiplication.
 But father came and raised his foot,
 He snorted in derision,
 The chap struck earth three miles away,
 Pa said, "That's long division."

ON THE BOSOM OF THE WABASH

A ROMANCE OF THE DEEP.

Now Jane, I'm tellin' you, is some girl;
 She's got it all over your Maud and Pearl.
 She's got class, and she's got a way.
 She's an East Side "Home Guard," they say.
 I met her on Main, one night about nine,
 And I labeled her "Extra Super Fine."

(Lapse of time while we change reels.)

O'er the broad and silent Wabash
 The great full moon hung low;
 Across the water's dark expanse
 I could see the Trail lights glow.
 The canoe was drifting broad-side.
 To our ears came a far off tune.
 Our eyes were dreamily fixed on the face
 Of the round and smiling moon.

The moon went out,
 Like a blown-out lamp;
 And I'm here to tell you
 The river was damp.
 Did I get wet?
 For the love of Rover!
 Honest to Jake,
 I was drowned—all over!

Up and down the streets I wander,
 Searching for another girl.
 Any sort of a girl considered,
 E'n a Maud, perhaps, or Pearl.
 What's life without its recreations?
 Harken to this sweet refrain:
 I am seeking for a maiden,
 Any maiden—but a Jane!

When I came up
 I had mud in my hair,
 Mud down my neck
 And everywhere.
 The water was not
 More than two feet deep
 But 'twas colder 'n ice
 And wet a heap.

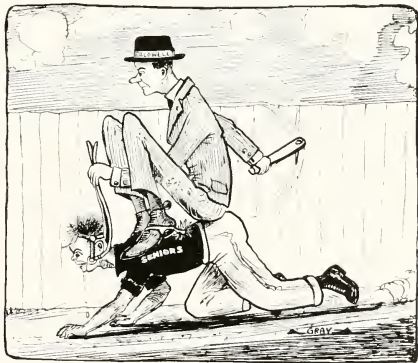

At first I thought I was all alone.
 The canoe was gone. Then I heard a groan.
 Jane spit out four clam-shells, and minnows two,
 And then, say kid, the air got blue.

"You knock-eyed, fan-eared scissor-bill, you!
 What did you think you were trying to do?
 You pimply-faced hick; you ornery boob!
 I'm through with you. Do you get me—slob?"

That was far from the worst—I omit the rest—
 This Jane's some flowery when she's goin' her best.
 At last we got to the east side bank.
 Never knew Jane to be such a crank.
 We walked to town; many miles, I'll say.
 Bet the memory sticks to my dying day.

ANNUAL SENIOR-

IN accordance with a time honored custom, the annual Senior-Junior Parade was held on the afternoon of Saturday, October 2, just before the opening of the Purdue-Wabash football game. The custom originated with the class of 1905 and has been followed annually at the opening football game of the season.

Promptly at 2:30 o'clock the parade assembled in front of the Electrical building in column of fours, the Seniors in their new corduroy trousers, dark coats and derby hats; and the Juniors displaying for the first time their white class hats with

JUNIOR PARADE

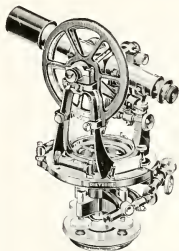

blue bands. Headed by the Purdue band of seventy pieces the procession moved on to the field in open column. A double column left brought them up to the stands where a hearty applause burst from the audience. A halt was called for a group picture, after which the students marched up to the sections which had been reserved for them. The procession was a very impressive one. Three hundred and twenty-four Seniors together with four hundred and nineteen Juniors took part in the event.

Why We Go

Adam and Eve
 Front row at the "Fambily."
 Says Adam: "I think that
 They do that dance damnably."
 Says Eve: "Let's go up there
 And show 'em a thing-or-two."
 Says Adam: "B'gosh!
 I'm with yuh. Let's do."
 Adam and Eve
 Glide out in the spot-light.
 Freshman tumbles from balcony;
 Didn't hold on tight.
 Startled gasp, and then silence.
 Awe-stricken, suppressed.
 Whisper—"Why, Mamie!
 They're almost undressed!"
 Huge forty-piece (?) orchestra
 Blatently blares;
 "Ma's got a jag on
 But nobody cares."
 The dancers whirl round and round,
 Swaying and dipping,
 Kicking and spinning;
 The audience yipping.

"Marvelous, wonderful,"
 A bald-domed old prof. sighs,
 A devilish gleam
 Lighting both his weak eyes.
 An elderly fat lady,
 Second box—right,
 Rises and "hollers,"
 With unfeigned delight.
 Eighty-nine bouquets
 And ninety-eight encores.
 Then the cops kick the crowd out
 And double-lock all the doors.
 Now Adam and Eve
 Draw ten thousand a night.
 You have to buy seats
 A year ahead. It's a fright!
 Says I to the manager one day,
 "It's a rotten, low-class show!
 Why don't you make 'em wear more clothes,
 Make it decent, don'tchaknow?"
 For five long breaths he glared at me;
 Then he spat, and gave a grunt.
 "You poor, half-witted boob," said he.
 "It's what the people want."

J. R. Modlin—"Absolutely the worst I ever saw."

There are Two Reasons Why Stafford Engravings are used in this Annual and why they should be used in Yours

The First, of course, is quality. Through years of specialization, our organization has become unusually expert in half-tones, color plates, zinc etchings, and designs for college and school publications. We have the very best shop equipment and every facility for prompt production of quality work.

The famous Levy Acid Blast process gives our half-tones a cleaner, deeper, sharper etching than the tub method most commonly used, and makes it easier for your printer to give you a first class job.

The Second is Stafford Co-operation. For the benefit of our customers in their dealing with us, we have prepared a valuable handbook entitled "Engraving for College and School Publications," containing 164 pages and over 300 illustrations, and giving complete information in regard to planning your publication, the preparation of copy, and ordering of engravings. This book simplifies ordering, prevents costly mistakes, and means high quality engravings at lowest cost. We do not sell it—but we lend a copy to the staff of each publication for which we make the engravings.

Let Stafford make your commencement invitations, fraternity stationery, visiting cards, and any other copper plate engraving or steel die embossing. We have a large department devoted exclusively to this class of work, and can give you both quality and service. Samples with prices on request.

THE CEMENT THAT SATISFIES

While the U. S. Gov't Specifications will not allow anyone to make and market any cement except good cement, yet there is a superior quality and attractiveness about CHICAGO-AA Portland Cement that make it most desirable for use in the better class of work. As a matter of fact, the greatest demand for CHICAGO-AA is from contractors who have been using it for many years—contractors who have learned of its dependability.

When better cement can be made, CHICAGO-AA will be one of the first brands to be improved.

**FOLLOW THE LEAD
 OF THE
 BIG BUSINESS MEN**

Nearly all of the world's biggest business and professional men carry Life Insurance. They *safeguard their success* by their Life Insurance investments.

Starting as young men with \$2,000 to \$5,000 policies, they take out more as they prosper from year to year.

These policies represent actual, cashable savings investments, and afford absolute protection during the time the young man is reaching his financial independence.

It is safe to follow the lead of those who have *succeeded*—and Legal Reserve Life Insurance is within your reach, just as it was within the reach of the millionaire when he was at the point where you now stand.
